

Student Records Transfer

Last Modified on 12/12/2025 9:45 am CST

Tool Search: Student Records Transfer

Records Transfer functionality varies from state to state. See your state [Localization](#) page for specific information.

See the [Student Records Transfer Tool Rights](#) article for information on tool rights needed to complete this process.

The Student Records Transfer tool allows districts to transfer integral student data electronically to other districts using the same regional or State Edition of Campus. The state or regional edition acts as the intermediary that facilitates the exchange process between districts.

To view details of student records transfer activity, select each student within the Transfers window.

Student Records Transfer

Main Technical Components

The terms in this section outline the primary components of the student records transfer process.

- **Agent-** Transferring records within a Campus State Edition occurs through Campus agent-to-agent communication. There are three agents involved in a records transfer:
 - **State-level agent** - (*The agent existing in the state-level installation of Campus.*)
The state-level agent is the main facilitator of all agent communication and makes requesting and transferring records possible.
 - **New district agent** - (*The agent in the new district to which the student has transferred.*)
The new district may enroll the new student and then request his/her records from the former district by creating a records transfer request. The new district's agent will send the request message to the state-level agent. The state-level agent will then route the request message to the agent in the student's former district.
 - **Former district agent** - (*The agent in the previous district that the student no longer attends.*)
The agent in the student's former district will receive the records request message from the state-level agent on behalf of the new district. The designated records transfer user in the former district will approve the release of the student's records. The agent in the

former district will send the records in a message to the state-level agent. The state-level agent will then route the records to the new district.

- **State zone** - The designated area in which the district agents communicate through the state-level agent. The state zone is accessible by each district and at the state.

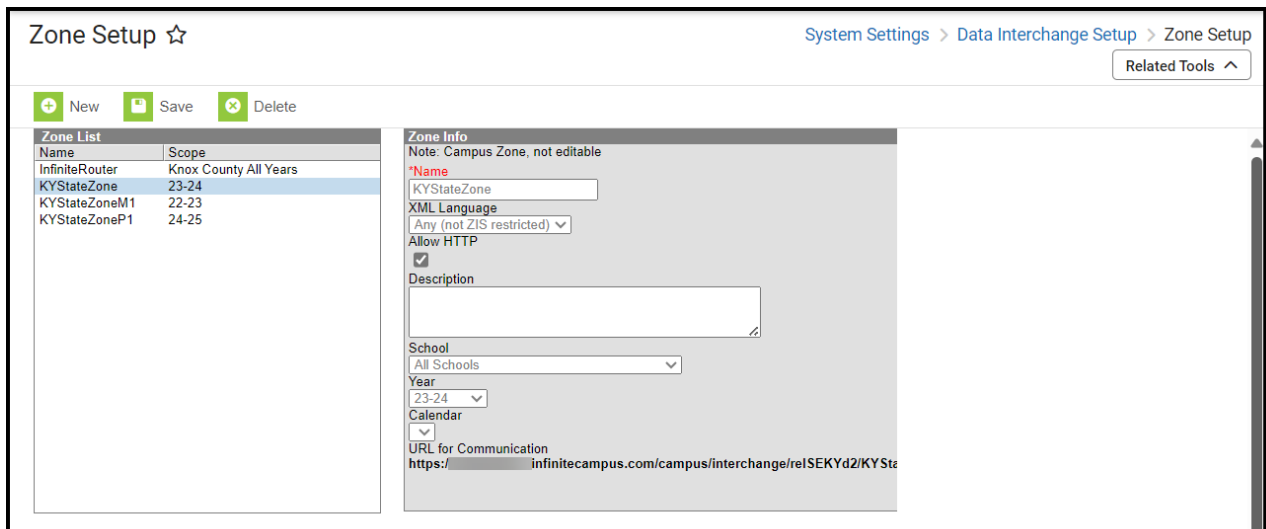

DIS Agents and Zones

Tool Search: Zone Setup, Agents

Completing a student records transfer between two districts uses DIS messaging and involves built-in Campus agents installed by Campus hosting staff during the district/state's initial configuration.

To allow an intrastate records transfer, Campus hosting sets up DIS communication between district and state agents.

Districts do NOT communicate directly with each other. All messaging and data movement between districts flows through the state-level agent.

State-Level View of Each District Zone

At the state level, a zone exists for each district within the state to facilitate communication and exchange messages related to student data, including records transfer within the state.

Enroll Students with the Student Locator

Tool Search: Student Locator

Districts are required to use the [Student Locator](#) tool to add and enroll new students, preventing duplicate entries and records from being created for the same person.

When the student is enrolled and located by the Student Locator, it means he/she is transferring from another district within the same state/region and already has a record in the state database. This indicates that his/her records can be requested from the former district once the student is enrolled.

Student Locator

Student Search

Search for a student already tracked in Campus using the fields provided. A minimum amount of data must be entered in order to search. The user must enter the State ID, the SSN, or the full legal lastName, firstName and gender. Select a student from the list or click on Create New Student. When doing a SSN-only search, the user must still do a name based search before they are allowed to create a new person.

Locating a Transfer Student for Enrollment in a New District

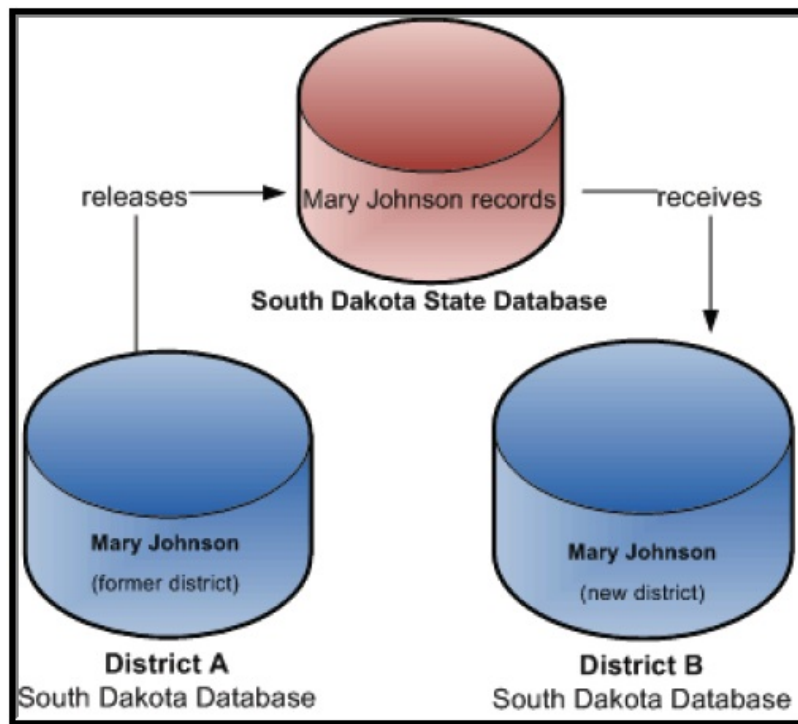

Student Records Transfer

The following sections detail the necessary steps for completing a student records transfer:

1. [New District Requests a Student Records Transfer](#)
2. [Former District Responds to a Student Records Transfer Request](#)
3. [New District Receives Released Records from Former District](#)

For a student records transfer to be possible, the state database must have a record of the student's former enrollment and the student's *stateID* number.

When the Student Records Transfer is requested or released, the messages and data are funneled through the state to the new district via the [state agent](#).

Sample Transfer of Student Records

New District Requests a Student Records Transfer

Tool Search: Records Transfer

A records transfer may be requested at any time after the transfer student has been enrolled in the new district. The records transfer page will display immediately after the student's new enrollment is saved.

The transfer can be performed at the time of enrollment or at a later date. To request a transfer, navigate to the [Records Transfer](#) tool, select the **New State Transfer Request** icon (if applicable), and select the **Submit Request** button.

New District's Process Inbox - Waiting Status

During this time, the new district will not know what district the student previously attended.

Release Records
Reject Request
Ignore Request

Former District - Incoming Records Request

The former district is expected to respond to the request in one of three ways:

- **Release Records** - Student records and the previous district's contact information is sent to the new district. A notice appears in the new district's Process Inbox stating "Transfer Released."
- **Reject** - No student records are sent to the new district. A notice appears in the new district's Process Inbox stating "Transfer Rejected." The previous district's contact information is visible.
- **Ignore** - No student records or former district information is sent. A notice appears in the new district's Process Inbox stating "Transfer Rejected." This is an anonymous rejection with no indication of the former district.

The **Ignore** feature should only be used in the event that a former district has a valid, legal reason to withhold student information from the new district (*e.g.*, court order, witness protection program agreement).

Enrollment Overlap Indicator

In case the former district has not ended the student's enrollment in its district at the time it receives the Student Records Transfer request, an enrollment **Overlap** indicator will appear with the student's current and active enrollment displayed.

Enrollment Overlap Indicator

Selecting the **Edit** link will redirect the user to the student's [Enrollments tab](#) where his/her enrollment may immediately be ended.

The Overlap indicator only appears if a student's enrollment in his/her former district has not been ended. This message may be the first notification to the former district that a student has transferred and is enrolling into a new district.

Mismatched Data

To prevent mistaken transfers of student data, Campus only allows a district to release student records if an exact match is found between districts.

Therefore, if the new district enters the student's information incorrectly (e.g., spells the name wrong or enters the wrong birthday), the former district will not be able to release the records for the student. When the new district user clicks on the records release link, an error will display.

Records Transfer Objects

See the [Record Transfer Objects](#) section for more information about which objects are transferred during the student records transfer.

New District Receives Released Records from Former District

When the former district selects the **Release Records** option, records are sent to the new district. The new district will receive a message link in its Process Inbox containing the student's records and the former district's contact information.

Records transfers can be accessed in three areas of Campus, when the appropriate user rights have been assigned:

- *Process Alerts (formerly Process Inbox) (until deleted)*
- *Student Information > General > Student Records Transfer (permanent record)*
- *System Settings > Data Interchange > Student Records Transfer (permanent record)*

A released records transfer message will contain two methods of receiving the transferred student records. It is the responsibility of the new district to complete the records transfer by importing and/or entering the relevant data.

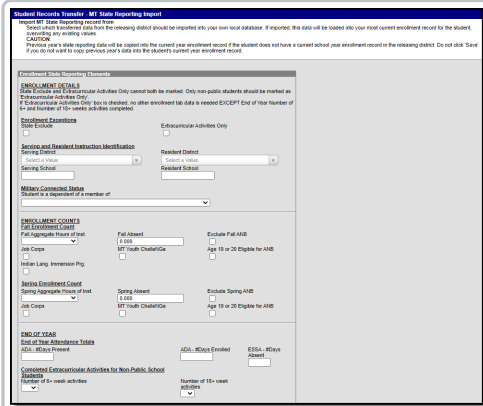

Record Type	Description and Logic	PDF is Sent	Data Import Wizard
Assessment	<p>All District, State and National tests are transferred. This includes test dates and scores.</p> <p>At this time, Assessment records are not included as part of a National Records Exchange request. MT Supplemental Documents	Montana-specific Special Ed data is transferred.	No	Yes
MT State Reporting	Montana-specific enrollment data is transferred. <div data-bbox="432 875 917 1279">  </div>	No	Yes

Data Import Wizards

Within the body of a released records transfer, users will have the option to directly import student records.

Using a Data Import Wizard may require the new district to adapt and map codes/values used by the former district to fit those of the new district. Users should be aware that running an Import Wizard more than once for the same student may produce duplicate records.

School/district's cannot access and import data via a Records Transfer request after 4 years have passed since the initial transfer request date. After four years, schools that would like to access and import an expired records transfer request will need to request a new records transfer.

The following Import Wizards are available in a release records transfer (as long as the student has

records related to that type of Import Wizard):

- [Transcript Import Wizard](#)
- [Extended Census Import Wizard](#)
- [Enrollment History Import Wizard](#)
- [Assessment Import Wizard](#)
- [Immunization Import Wizard](#)
- [Health Condition Import Wizard](#)
- [Health Screening Import Wizard](#)
- [IEP Import Wizard](#)
- [Special Education Evaluation Import Wizard](#)
- [Special Education Document Import Wizard](#)
- DE Meeting Invite Import Wizard (Delaware Only)
- [Special Education Summary Import Wizard](#)
- [PLP Import Wizard](#)
- [PLP Documents Import Wizard](#)
- State Reporting Elements - Available in some states
- [EL Import Wizard](#) - Available on a state-by-state basis

The following tables are general representations of the fields available for import. Transfer results will vary, depending on the student's actual data. Users should expect to map elements that differ between districts.

Transcript Import Wizard

The following fields from the student's [Transcript tab](#) will transfer from the former district to the requesting district:

Montana Only: Transcript Session Type, Session Number, and Secondary Credit information is also transferred and saved upon import of transcript data via the Transcript Import Wizard.

Kentucky Only: Difficulty Level data is transferred and saved upon import of transcript data via the Transcript Import Wizard.

If the [Default for Transfer preference is set on a transcript](#), this transcript is the default transcript sent when performing a records transfer via the National Records Exchange or Student Records Transfer. Only one transcript report per school can be marked as Default for Transfer.

Transcript History		
Actual Term	End Term	Score
Attempted	GPA Max	Standard Name
Bonus Points	GPA Value	Standard Number
Comments	GPA Weight	Start Term
Course Name	Grade	State Code
Course Number	Percent	Terms Long
Date	School Import	Transcript Credit
District Number	School Name	Unweighted GPA Value
Earned	School Number	SCED Subject Area <div>This field is only available for states using SCED course codes.</div>
		SCED Course Identifier <div>This field is only available for states using SCED course codes.</div>

Transcript data may be mapped and imported into the new district. Records may be saved as the names and numbers defined by the former district or as local names and numbers defined by the new district.

If a student has left and then returned to the same district, you should mark the **Don't Import** checkbox for each transcript correlating to enrollment records already existing within your system.

The print format must be defined. If more than one transcript exists for the calendar, the latest one (in database order) will be sent.

The screenshot displays the 'Transcript Import Wizard' interface. At the top, there is a 'Credit Multiplication Factor' field set to 1 and an 'Adjust All Credits' button. Below this, there are two identical entry forms. Each form includes a 'Don't Import' checkbox, a '*School Year' dropdown (set to 2007-2008), a '*Grade' dropdown (set to 09), a 'District No.' field (6001), a 'School No.' field (1), a 'School Name' field (Central High School), a '*Course Number' field (123 for Advocate A1, 234 for Debate 1 A), and a 'Course Name' field. Below these are fields for '*Score' (A-), 'GPA Weight' (0), 'GPA Value' (4), 'Percent' (4), 'GPA Max' (4), 'Unweighted GPA Value' (4), '*Earned' (empty), '*Attempted' (empty), and '*Transcript Credit' (empty). Further down are 'Bonus Points', 'Standard Number', 'Standard Name', 'Date' (10/22/2007), 'Actual Term' (1), 'Start Term' (1), 'End Term' (4), 'Terms Long' (4), and 'State Code' (empty). A 'Comments' field at the bottom of each form contains the text 'Imported from 06001 Aberdeen 06-1 Records Transfer.'

Transcript Import Wizard

Fields in red are required for the transcript entry to be properly saved to the student's record.

When transferring transcript records, the Earned and Attempted fields will be populated with data as entered on the Transcript tab.

If flagged, the **Don't Import** checkbox indicates that the selected transcript entry will not be imported as part of the student's transcript history.

When importing transcript information, districts will want to consider adjusting credit types, which may differ substantially between the exchanging districts. The **Credit Multiplication Factor** field and **Adjust All Credits** button can be used to mass-adjust credit amounts. Individual entries may also be adjusted.

Extended Census Import Wizard

The following fields from the student's [Demographics tab](#) will transfer.

Extended Census	
Birth Country	Date Entered US
Date Entered US School	Home Primary Language
Birth Verification	Nick Name
Alternate Language	

Student Records Transfer - Extended Census Import

Import Census records from 32002 Pierre 32-2
Enter the transferred data from the releasing district into your own local database.
Values entered in the 'Value to Save' column will be saved into the student's current identity record.

	Current Value	Imported Value	Value to Save
Birth Country	France	Belgium	FR: France
Date Entered US	08/03/2009	08/03/2009	08/03/2009
Date Entered US School	09/08/2009	09/08/2009	09/08/2009
Home Primary Language	French	English	French
Birth Verification	Birth Certificate	Birth Certificate	Birth Certificate
NickName	QA-J	QA-J	QA-J

Extended Census Import Wizard

Enrollment History Import Wizard

The following fields from the student's [Enrollments tab](#) transfer when not null in the former district:

Enrollment History		
Calendar Name	State End Status	Start Date
District Name	Grade	State Start Status
End Comments	Service Type	
End Date	Start Comments	

For Enrollment Statuses, the Local Start Status and Local End Status do not transfer; however, data in those fields are populated based on the receiving district's list of start and end statuses.

All historical enrollments recorded by the former district can be mapped and imported to the new district. This includes any out-of-district enrollments that were recorded in the former district.

Student Records Transfer - Enrollment History Import

Import Enrollment History records from 0902 School District #1

Enter the transferred data from the releasing district into your own local database. Enrollment Start/End codes can be mapped to a local value if

District Name School District #1	*Calendar Name 15-16 High School	*Grade 09	NCES Grade 09
*Start Date 09/15/2015	End Date 06/03/2016	*Service Type P: Primary	
Local Start Status 03: Re-entry to the same school after withdrawal (Valid 93-)	Local End Status		
State Start Status 03: Re-entry to the same school after withdrawal	State End Status 100: End of year, returning to same school next year		
Start Comments Egypt	End Comments		

District Name School District #1	*Calendar Name 16-17 High School	*Grade 10	NCES Grade 10
*Start Date 09/06/2016	End Date 06/06/2017	*Service Type P: Primary

State Start Status 02: Continued enrollment same school, no interruption	State End Status 100: End of year, returning to same school next year		
Start Comments	End Comments		

Enrollment History Import Wizard

When importing enrollment history information, users may need to enter **Local Start** and **Local End Status** codes. No graduation, state-reporting, special education or custom elements are included.

Fields in red are required for the record to properly save.

For Same State Transfers

Local Start Status	Local End Status
<p>Local Start Status is not a required field when data is transferred, but it is required on the student's enrollment record.</p> <p>Local Start Status populates based on the State Start Status transferred from the prior district.</p> <p>If the receiving district has defined a Local Start Status in the Enrollment Status Mapping tool that meets the following requirements, the Local Start Status is populated with that value:</p> <ul style="list-style-type: none"> • Is an exact match of the sending district's State Start Status on description. • Has the same State Start Status mapped. • The end year is either null (blank) or after the end year of the enrollment. <p>If there is no local code that meets the above requirements, the Local Start Status field displays blank. If the user saves the local enrollment Start Status with a blank value, the existing State Start Status must save to the database and displays on the student's enrollment record.</p> <p>The Local Start Status on the enrollment history import remains available for selection to allow for a district override. If the district overrides the value, the State Start Status tied to the Local Start Status is saved.</p>	<p>The Local End Status populates based on the State Status transferred from the prior district. If the receiving district has defined a Local End Status in the Enrollment Status Mapping tool that meets the following requirements, the Local End Status populates with that value:</p> <ul style="list-style-type: none"> • Is an exact match of the sending district's State End Status on description. • Has the same State End Status mapped. • The end year is either null (blank) or after the end year of the enrollment. <p>If no local code meets the above requirements, the Local End Status field displays blank. If the user saves the local enrollment End Status with a blank value, the existing State End Status saves to the database and displays on the student's enrollment history record.</p> <p>The Local End Status on the enrollment history import remains available for selection to allow for a district override. If the district overrides the value, the State End Status tied to the Local End Status is saved.</p>

For National Records Exchange - State A to State B

There are no data transfers in the Enrollment History Import Wizard. The existing state and local enrollment statuses are transferred via the PDF Enrollment History document.

For National Records Exchange and State Records Transfers

Local Start Status is not a required entry on the Import Wizard. However, it is still required on the student's Enrollment record. If a Local Start Status has not been provided, data imports with a blank Local Start Status and must be entered when any modification is made to the Enrollment record.

Assessment Import Wizard

At this time, Assessment records are not included as part of a National Records Exchange request. NRE users will only receive an assessment summary for the student.

The following fields from the student's [Assessments tab](#) will transfer when not null in the former district:

Assessments		
Comments	Percent	Result
Date	Percentile	Scale Score
Equivalent	Question Count	Test
Normal Curve	Raw Score	

Assessment information, including test scores, can be mapped and imported to the new district as long as the new district has already established the proper test structure.

The test structure **MUST** exist before the import can occur. It must be formatted in a manner appropriate to receiving the assessment information.

Strand: 2010 CRT Math Grade 11 (10Gr11MathCR)

Test	Date	Scale Score	Raw Score	Percent	Percentile	Question Count	Normal Curve Equivalent
2008 CRT Grade 8 Dakota Step (08Gr8CR)	04/23/2010	794	75

Hemophilus influenza, type B [Hib] 07/20/1993 09/23/1993 11/18/1993
Hemophilus influenza, type B [Hib]

Immunization Import Wizard

Immunization certificates, vaccine names, shot dates and exemptions can be imported to the new district. In the **Vaccine Name** fields, the import wizard will display the vaccine it presumes to be the correct match.

Vaccine names are core fields in Campus and should not vary between districts; however, if necessary, the **Vaccine Name** field allows the user to specify the vaccine to which the record should be mapped.

When importing immunization data to a student that already has an existing Immunization Certificate record, the existing record is deleted and the new Immunization Certification is imported.

Health Condition Import Wizard

The following fields from the student's health [Conditions tab](#) will transfer when not null in the former district:

Health Conditions

Health Screening Import Wizard - Don't Import Option

IEP Import Wizard

IEP data is pulled from the Plan folder of the [Special Education Documents tab](#) in the former district.

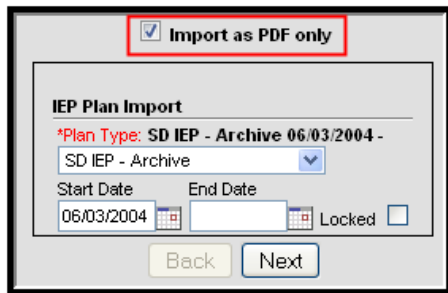

IEP Import

The former district sends a student's most recent, active and locked IEP plan for importing in the new district database. All services related to the plan are included.

When not null, these items are sent to the new district: **Plan Type** name, **Start Date/End Date** of plan, names of all **Service(s)** provided by plan, name of the **Service Provider** and **Service Position** title.

Bolded text indicates values sent from the former district. These values are NOT imported into the new district.

If the plan should be imported as a PDF to the Forms section of the Documents tab, flag the **Import as PDF only** checkbox. When this box is flagged, the IEP will NOT be imported to the Plan area of the Documents tab and will NOT be editable.

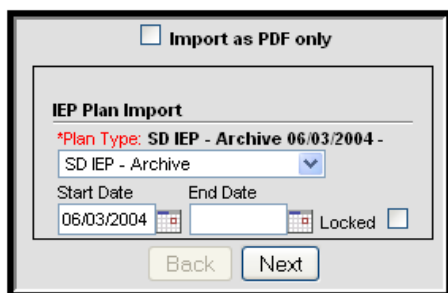

The screenshot shows the 'IEP Plan Import' form. At the top, the checkbox 'Import as PDF only' is checked and highlighted with a red rectangle. Below this, the form displays the following fields:

- *Plan Type:** SD IEP - Archive 06/03/2004 - (with a dropdown arrow)
- Start Date:** 06/03/2004 (with a calendar icon)
- End Date:** (empty field with a calendar icon)
- Locked:** (unchecked checkbox)

At the bottom of the form are two buttons: 'Back' and 'Next'.

IEP Plan Import - Import as PDF Only

When importing the plan, the new district is required to map the **Plan Type** to a similar item within the district. The closest match is auto-selected upon import.

The screenshot shows the 'IEP Plan Import' form. At the top, the checkbox 'Import as PDF only' is unchecked. Below this, the form displays the following fields:

- *Plan Type:** SD IEP - Archive 06/03/2004 - (with a dropdown arrow)
- Start Date:** 06/03/2004 (with a calendar icon)
- End Date:** (empty field with a calendar icon)
- Locked:** (unchecked checkbox)

At the bottom of the form are two buttons: 'Back' and 'Next'.

IEP Plan Import

The **Start Date/End Date(s)** are transferred from the former district and may be modified, as necessary.

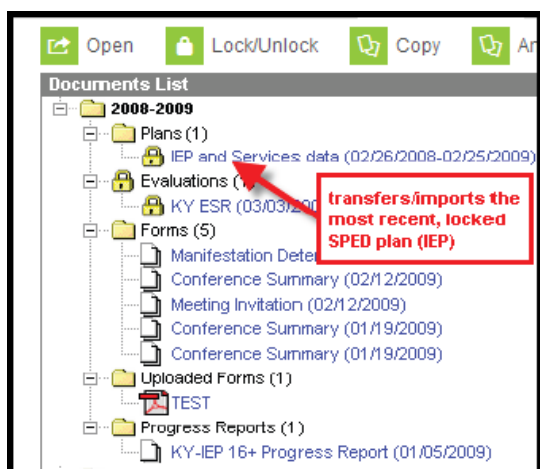

The **Locked** checkbox should be flagged if the new district wants to import the plan in locked format so only an administrator with the proper tool rights can modify it.

Each **Service** associated with the plan will be included in the import. If the service should be imported, it must be mapped to a similar item within the district. If a service should not be imported, the **Do Not Import the following service** checkbox should be flagged.

IEP Services Import

The **Service Provider** and **Service Position** fields may be mapped, as desired. The **Display on Print** checkbox should be flagged if the Service Position field should display when the plan is printed in lieu of the Service Provider's name.

After importing, the transferred IEP will appear in the Plans section of the current school year on the student's [Documents tab](#).

Plans Section of the Documents tab

If a document that has the same name as a document already in the system is imported, the Student Records Transfer compares the last modified date on the form. Several import options are available:

Import Comparison Options

Special Education Evaluation Import Wizard

Evaluation data is pulled from the Evaluations folder of the [Special Education Documents tool](#) in the former district.

Kentucky Only: The KY Consent to Evaluation and KY Referral documents do NOT transfer using this import tool; instead, they are imported through the Special Ed Documents as read-only PDF documents.

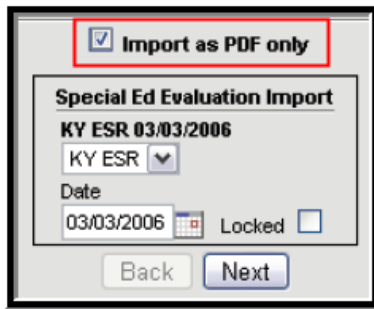

Evaluation Import

The former district sends the student's most current special education evaluation.

When not null, all existing editor data for the evaluation is transferred (*e.g.*, all field data from the evaluation header, information editors, results).

Bolded text indicates values sent from the former district. These values are NOT imported into the new district.

If the plan should be imported as a PDF to the Forms section of the Documents tool, flag the **Import as PDF only** checkbox. When this box is flagged, the IEP will NOT be imported to the Plan area of the Documents tab and will NOT be editable.

The dialog box is titled "Special Ed Evaluation Import". At the top, there is a checkbox labeled "Import as PDF only" which is checked. Below this, the text "KY ESR 03/03/2006" is displayed. Underneath, there is a dropdown menu showing "KY ESR", a "Date" field with "03/03/2006" and a calendar icon, and a "Locked" checkbox which is unchecked. At the bottom, there are "Back" and "Next" buttons.

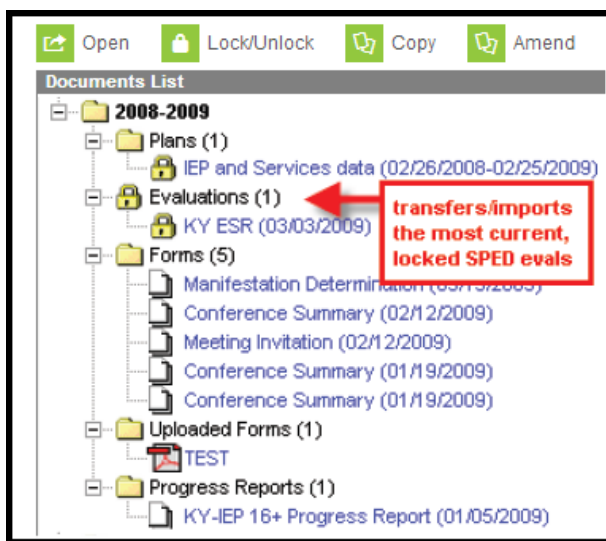

Special Ed Evaluation Import

When importing, the new district is required to map the evaluation to a similar item within the district. When an evaluation is mapped, all data will transfer, provided the proper editors are enabled for that evaluation in the new district ([System Administration > Special Education > Eval Types](#)).

The evaluation **Date** is transferred from the former district and may be modified, as necessary.

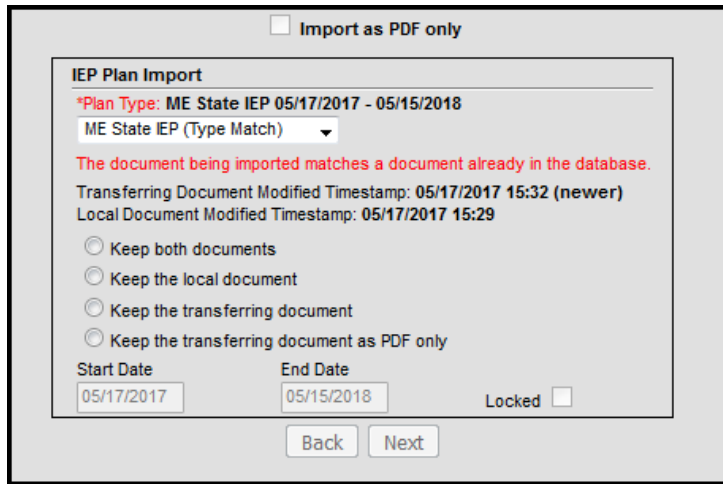

The **Locked** checkbox should be flagged if the new district would like the import the evaluation in locked format so only an administrator with the proper tool rights can modify it.

After importing, the transferred evaluation will appear in the Evaluations section of the current school year on the student's [Documents tab](#).

Locked Evaluation on the Documents Tab

If a document that has the same name as a document already in the system is imported, the Student Records Transfer compares the last modified date on the form. Several import options are available:

☐ Import as PDF only

IEP Plan Import

*Plan Type: ME State IEP 05/17/2017 - 05/15/2018

ME State IEP (Type Match)

The document being imported matches a document already in the database.

Import Comparison Options

Special Education Summary Import Wizard

The most recent State Reported and Data Entry record from the [Special Education Summary](#) tool transfers as live, editable data. The only fields that apply are Start Date, End Date, and Special Ed Setting.

Student Records Transfer - Special Ed State Import

Enter the transferred data from the releasing district into your own local database. Enrollment Start/End codes can be mapped to a local value if applicable. Wherever data is named the same in the releasing data, this will already be done for you.
 Local Start Status is not a required selection on this tool, but is required on the student's Enrollment record. If Local Start Status has not been provided, data imports with a blank Local Start Status, and must be entered when any modification is made to the Enrollment record.

Start Date: 01/01/2025	End Date: 07/23/2027
Special Ed Setting: 03	

Special Education Summary Import Wizard

Click **Save** to import the Special Education Summary record.

PLP Plan Import Wizard

PLP data is pulled from the Plan folder of the [PLP Documents tab](#) in the old district.

PLP Plan Import

The former district sends a student's most recent, active, and locked PLP plan for import into the new district database. The plan includes all related services.

When not null, these items are sent to the new district: **Plan Type** name, **Start Date/End Date** of plan, names of all **Service(s)** provided by plan, name of the **Service Provider** and **Service Position** title.

Bold text indicates values sent from the former district. These values are NOT imported into the new district.

If the plan should be imported as a PDF to the Forms section of the Documents tab, flag the **Import as PDF only** checkbox. When this box is flagged, the PLP will be NOT be imported to the Plan area of the Documents tab and will NOT be editable.

PLP Plan Import Wizard

When importing the plan, the new district is required to map the **Plan Type** to a similar item within the district. The closest match is auto-selected upon import.

PLP Plan Import

The **Start Date/End Date(s)** are transferred from the former district and may be modified, as necessary.

The **Locked** checkbox should be flagged if the new district would like the import the plan in locked format so only an administrator with the proper tool rights can modify it.

Each **Service** associated with the plan will be included in the import. If the service should be imported, it must be mapped to a similar item within the district. If a service should not be imported, the **Do Not Import the following service** checkbox should be flagged.

PLP Services Import

The **Service Provider** and **Service Position** fields may be mapped, as desired. The **Display on Print** checkbox should be flagged if the Service Position field should display when the plan is printed in lieu of the Service Provider's name.

After importing, the transferred PLP will appear in the Plans section of the current school year on the student's [Documents tab](#).

Locked Plans on the PLP Documents Tab

If a document is imported that has the same name as a document already in the system, the Student Records Transfer compares the last modified date on the form. Several import options are available:
