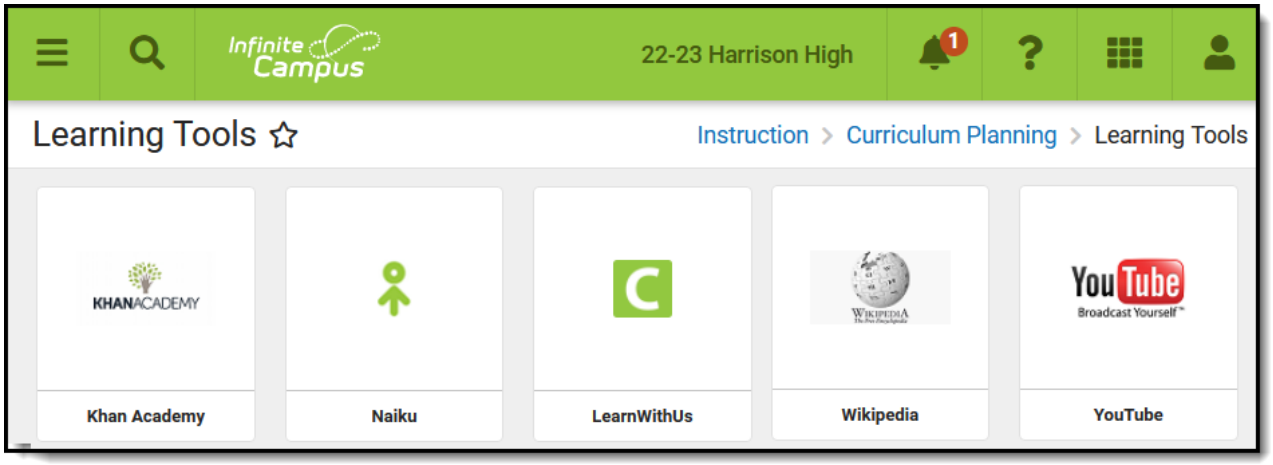
Tool Search: Learning Tools

The Learning Tools list provides links to all the providers of learning materials enabled by your district.



Click a Learning Tool link to be taken to the provider's site.

Access to this tool is not governed by tool rights. This tool is available if the district has any LTI connections enabled with Learning Tool selected.

Providers must be enabled by the district to display in this list. Click on a provider to visit the site and view available materials.

This list includes a list of free providers and providers purchased by your district - options vary by district. Districts enable these providers through the LTI Configuration tool. Available providers are those that have the ✔ LEARNING TOOL lozenge on the configuration screen.

One Learning Tool that may be enabled by a district is called TAMS (Trusted Apps Management Suite). Rather than opening a specific tool, clicking TAMS provides a list of apps that have been approved by your district.

Content from some providers can also be linked to specific assignments. See the Attach Content article for more information.

Some providers allow scores entered in the provider's site to pass back to the grade book, if your district has purchased and enabled this connection.
