

School Standards Setup

PATH: *Grading & Standards > School Standards*

The School Standards tab is used to determine which [Credit Groups](#) and [Standards Banks](#) are used in grading in the school selected in the Campus toolbar.

- [Credit Groups](#) are used as categories of credit on student transcripts.
- [Standards](#) are used in conjunction with standard-based grading by teachers.

After Credit Groups and Standards are selected here on the School Standards tab, they can be added to [Courses](#) and Course Masters. This tool simplifies using standards and credit groups at the school level so that individual schools don't have to look through all the items in the district when aligning items to course and masters.

The screenshot shows the 'School Standards' configuration page for 'Harrison High'. It is divided into two main sections: 'Credit Groups' and 'Standard Groups'. The 'Credit Groups' section has a search bar and a list with checkboxes for 'Elementary', 'High School Credit' (checked), 'Middle School', and 'Retired Credit Groups'. The 'Standard Groups' section has a search bar with 'Secondary' entered, a 'Show Archived' toggle set to 'OFF', and a list with checkboxes for 'Secondary Mathematics', 'Secondary Social Studies', 'Secondary Fine Arts', 'Secondary Science', 'Secondary ELA', and 'Secondary Algebra' (all checked). A 'Save' button is at the bottom left.

School Standards Tab Example

The Credit Groups and Standards also display when adding [Transcript Credits](#) to a student's Transcript.

Select School Standards

1. Mark the checkbox next to the credit group and standards group(s) to be used at the school.
2. Click **Save**.
