Tool Search: School Standard

The School Standard Setup tool determines which [Credit Groups](#) and [Standards Banks](#) are used for grading at the school selected in the Campus toolbar.

- [Credit Groups](#) are used as categories of credit on student transcripts.
- [Standards](#) are used in conjunction with standard-based grading by teachers.

After selecting Credit Groups and Standards on the School Standards tool, they can be added to [Courses](#) and [Course Masters](#). This tool simplifies using standards and credit groups at the school level so that individual schools do not have to review all the items in the district when aligning them to courses and masters.

The screenshot shows the 'School Standards' setup interface for Harrison High. It is divided into two main sections: 'Credit Groups' and 'Standard Groups'. In the 'Credit Groups' section, there is a search bar and a list of groups with checkboxes. 'High School Credit' is selected. In the 'Standard Groups' section, there is a search bar, a 'Show Archived' toggle (currently off), and a list of standard groups with checkboxes. Several groups are selected, including Secondary Mathematics, Secondary Social Studies, Secondary Fine Arts, Secondary Science, Secondary ELA, and Secondary Algebra. A 'Save' button is at the bottom left.
