TSDS Student Discipline Interchange Editor

Report Logic

- A record is reported for each disciplinary action that results in a student's removal from any part of their regular academic program.

- A single student will have multiple records if removed from their classroom more than once.
- Reported records are not based on whether or not a student has a Resolution Date entered that falls within the current school year. Records under this scenario would still be reported as the incident occurred within the reporting school year.
- Every disciplinary action that results in the removal of a student from any part of their regular academic program must be categorized as one of the following: In-School Suspension (ISS), Out of School Suspension (OOS), Expulsion, Juvenile Justice Alternative Education Program (JJAEP) or DAEP assignments.
- A record is reported for every behavior event with a 2-digit resolution code that occurred during the reporting school year. Resolution codes greater than 2 characters are not reported.
- To report, a Behavior record must have an entry in the Role field for the Role of Offender or Participant.
- If a student's enrollment has a Service Type of P, Primary, and a Service Type of S or N, data from the student's P (Primary) enrollment reports. If a student does not have a P, Primary, enrollment, then the enrollment that has a Service type of S or N that meets ALL other criteria reports.
- Summer School Enrollment data is not reported.

Students who meet the following criteria are NOT reported:

- Students with an ADA Eligibility = 0 or blank.
- Students with no State ID.
- Students marked as State Exclude, in a grade level marked State Exclude, or enrolled in a calendar marked State Exclude.
- Students marked No Show.

[Attendance Periods](#) must be created for calendar information to be considered in state reporting.

Report Editor

Field	Description
Submission	3 - Summer
Interchanges	Interchanges are XML Schema Definitions (XSDs), which group related complex types. Select Student Discipline .
Effective Date	Only data as of this date reports. The default value is the current date.
Status	<ul style="list-style-type: none"> • Regular • Resubmission • Working Collection
Report Type	XML
Filter By	This field allows you to narrow the report results to specific Calendars, Calendar Years (District), or Schools.

Field	Description
Population	This option allows you to limit report results to Unique IDs. The Unique ID option only considers students with a Unique ID, while the <i>All</i> option considers all students.
Ad Hoc Filter	Select an Ad Hoc filter to limit report results to those that meet filter requirements.
Report Generation	The report can be marked to generate immediately using the Generate Extract button or can be marked to generate at a later time using the Submit to Batch button. See the Batch Queue article for additional guidance.
