Web Service Configuration (Maine)

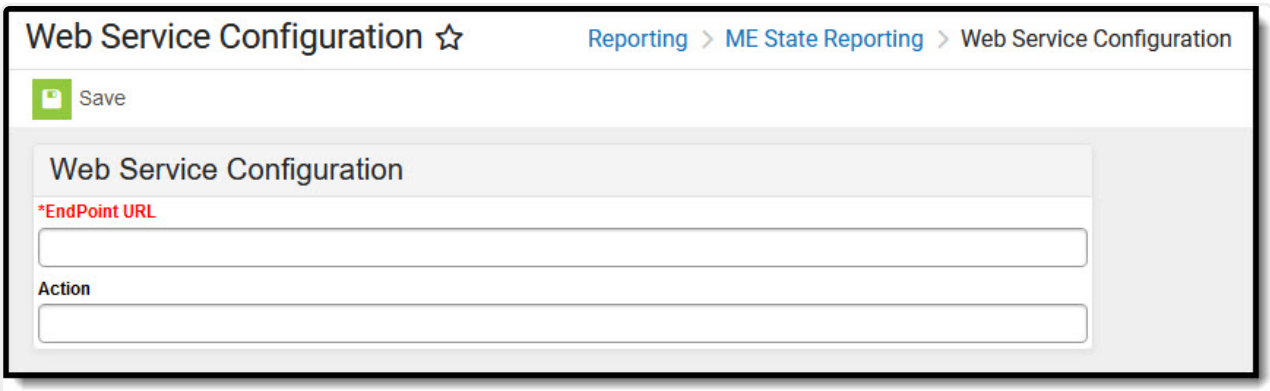

Last Modified on 10/13/2026 9:48 am CDT

As of the Campus .2643 Release, this tool is no longer available.

Tool Search: Web Service Configuration

The Web Service Configuration tool indicates where Campus should direct information to and receive information from the State servers (Synergy). This URL is critical for making the connection necessary to send Campus state reports to the state database(s).

This URL should be provided to you by the Maine Department of Education.

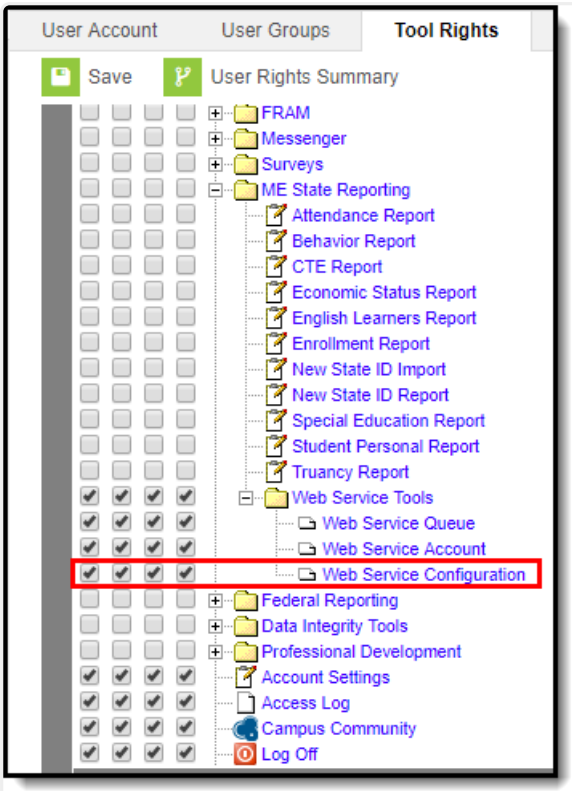

Maine Web Service Configuration Editor

Prerequisites

To establish the Web Service Configuration, you must first acquire the End Point URL, which the Maine Department of Education should provide.

Tool Rights

To enter and save Web Service Configuration data, you must have at least **R**(ead) and **W**(rite) tool rights to the Web Service Configuration tool.

Maine Web Service Configuration Tool Rights

Configuring the Web Service

In order to connect Campus to the State system (Synergy), you must:

1. Acquire the End Point URL from the state.
2. Insert the URL into the **EndPoint URL** field.
3. Select the **Save** icon.
4. Move onto the Web Service Account tool.

Next Steps

Once the web service has been configured, move on to establishing the Web Service Account.
