Tool Search: Web Service Configuration

The Web Service Configuration tool indicates where Campus should direct information to and receive information from the State servers (Synergy). This URL is critical for making the connection necessary to send Campus state reports to the state database(s).

This URL should be provided to you by the Maine Department of Education.

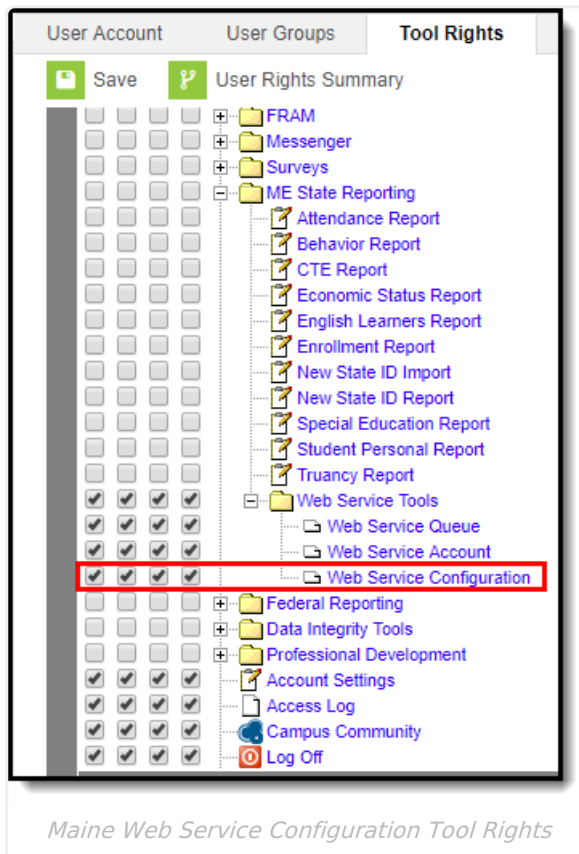

The screenshot shows the 'Web Service Configuration' tool interface. At the top, there is a title bar with 'Web Service Configuration' and a star icon, followed by a breadcrumb trail: 'Reporting > ME State Reporting > Web Service Configuration'. Below the title bar is a 'Save' button with a floppy disk icon. The main content area is titled 'Web Service Configuration' and contains two input fields. The first field is labeled '*EndPoint URL' in red text. The second field is labeled 'Action'. Below the input fields, the text 'Maine Web Service Configuration Editor' is displayed.

Prerequisites

To establish the Web Service Configuration, you must first acquire the End Point URL, which the Maine Department of Education should provide.

Tool Rights

To enter and save Web Service Configuration data, you must have at least **R**(ead) and **W**(rite) tool rights to the Web Service Configuration tool.

Configuring the Web Service

In order to connect Campus to the State system (Synergy), you must:

1. Acquire the End Point URL from the state.
2. Insert the URL into the **EndPoint URL** field.
3. Select the **Save** icon.
4. Move onto the [Web Service Account](#) tool.

Next Steps

Once the web service has been configured, move on to establishing the [Web Service Account](#).
