The **CTE Data Extracts (NV)** tool was deprecated as of **Campus.2243**. Please refer to the [CTE Reports](#) article for information on generating and submitting CTE data to the Nevada Department of Education.

**PATH:** [NV State Reporting](#) > [CTE Data Extracts](#) > [Course Grades Report](#)

The CTE Course Grades Report reports the scores earned by CTE students enrolled in CTE courses.

**CTE Data Extracts**

This extract editor will generate files to report CTE data. The reports will contain records for CTE students only. Non-CTE students should be excluded. The student's most recent active primary enrollment will be reported. If the student does not have an active enrollment, but the effective date is on or between the Start and End Date of the enrollment, the student's record will be reported in the extract. If the student's enrollment dates are outside the effective date of the report, the enrollment will be ignored and no record will be reported.

*CTE Course Grades Report*

## Report Logic

To appear in the report, the following must be true about each record:

- Students must be active AND enrolled in a CTE course at any time during the reporting period.
- Students must be scheduled into a course with the **CTE Course flag** marked on Course > Custom Data Elements.
- Data only reports from Primary enrollments.
- Courses marked as **State Exclude** are not included.
- The Course Type dropdown must be filled out for grades to report correctly ( *Course/Section* > *Course* >

Course Information > Custom Data Elements > Course Type ).

See the [CTE Data Extracts \(Nevada\)](#) article for directions for generating the extract.
