Tool Search: Immunizations

The Immunizations tool indicates a student's current level of immunization compliance, based on state requirements and his/her documented doses of a vaccine.

This page contains information on using the Immunizations tool to track student immunization records. The vaccination logic used to determine compliance displayed on this screen is based on state-specific immunization rules managed in the [Vaccines](#) tool.

The screenshot shows the 'Immunizations' tool interface. At the top, there is a user profile icon, the title 'Immunizations', and a breadcrumb trail: 'Student Information > Health > Immunizations'. Below the title are three buttons: 'Save', 'Print', and 'State Specific Print'. A 'Related Tools' dropdown menu is visible on the right. The main content area is titled 'Immunization Summary' and contains a table with the following data:

*** No vaccine doses on record.***	
Diphtheria-tetanus-pertussis, combined [DTaP, DTP] (code:DTaP-DTP)	Non-compliant
Polio [IPV, OPV] (code:Polio)	Non-compliant
Measles-Mumps Rubella [MMR] (code:MMR)	Non-compliant
Haemophilus influenza, type B [Hib] (code:Hib)	No Requirement
Varicella (code:Varicella)	Non-compliant
Tetanus, Diphtheria and Acellular Pertussis [Tdap] (code:Tdap)	Non-compliant

Below the summary table is a list of vaccine codes with expandable arrows:

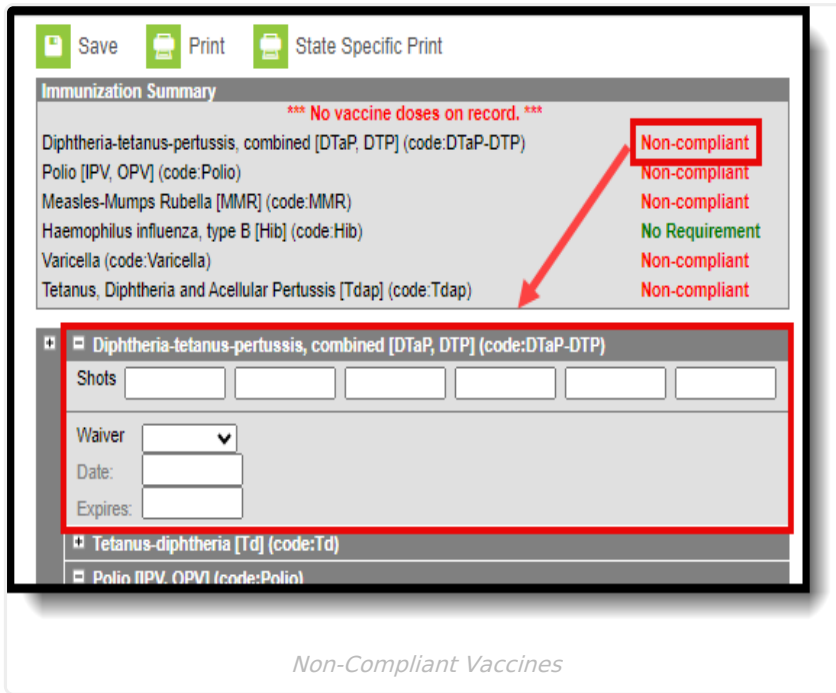

- ☐ Diphtheria-tetanus-pertussis, combined [DTaP, DTP] (code:DTaP-DTP)
 - ☐ Tetanus-diphtheria [Td] (code:Td)
- ☐ Polio [IPV, OPV] (code:Polio)
- ☐ Measles-Mumps Rubella [MMR] (code:MMR)
- ☐ Measles-Mumps-Rubella-Varicella [MMRV] (code:MMRV)
- ☐ Hepatitis B [Hep B] (code:HepB)
- ☐ COVID (Other 2 Dose) (code:COV2)

At the bottom of the screenshot, the text 'Health Immunizations' is displayed.

Vaccinations

Vaccine compliance is based on federal and state requirements. Most often, these rules are attached to the student's year of enrollment and age. Each state has different requirements for students' immunizations. This information is built into the product and is based on the student's age and year of enrollment.

Vaccines that are considered non-compliant are automatically expanded, allowing users to add these dates of vaccinations.

Vaccine entry requires a date of when the student was vaccinated, or a selection of a health waiver option and a date of when that waiver was given and, if available, a date of when the waiver expires.

Waivers can be entered for any vaccination required for a student. In most states, parents/guardians must fill out and sign a form and return that form to the district health office. Waiver types are limited to the following:

- Medical
- Conscientious/Religious Objection
- Lab Confirmation of the disease.

Waiver types are created in the [Vaccine Exemptions](#) tool.

Enter Student Immunization Information

1. Expand the **Vaccine** (if it is not already expanded) that needs to be updated by clicking the plus (+) sign next to the name of the vaccine.
2. Enter the date(s) the vaccination took place in *mm/dd/yy* format in the **Shots** field.
3. Click the **Save** icon when finished. The new immunization will be added to the student's list of vaccines. If the new entry satisfies compliancy, the indication of such will be changed.

Enter a Vaccination Waiver

1. Expand the Vaccine (if it is not already expanded) that needs to be updated by clicking the plus (+) sign next to the name of the vaccine.
2. Select the type of **Waiver** from the dropdown list.
3. Enter a **Date** for when the waiver became active.

4. Enter an **Expiration Date**.
5. Click the **Save** icon when finished. The Immunization Summary will be updated to reflect the waiver entry. Additional waivers can be entered as needed.

Print an Immunization Report

You can print a student's immunization report by clicking the **Print** or **State Specific Print** button.

Save Print State Specific Print
