Tool Search: Health Screenings Compliance Report

The Health Screening Compliance Report aids districts in identifying students who do or do not have specific health screenings in a date range or for an entire school year.

Health Screenings Compliance Report

This report includes students who either have or do not have Health Screening records within the entered date range. Screening records that contain only a date will not be included. Note that the Health Screening choices display the names of sub-screenings, which may be included in one or more Screening Types. For example, a Child and Teen Checkup sub-screening can be part of an Early Childhood or a Child & Teen Checkup Screening Type. To check on compliance for a Child & Teen Checkup Screening Type, you should select all of the sub-screenings contained in that Type (Height/Weight and Vital Signs, Vision, Hearing, Child and Teen Checkup, Developmental, and Social-Emotional).

- Leaving both date fields blank will include records found on all dates.
- Providing only a From date includes records from that date onward.
- Providing only a To date includes records prior to that date.

Selecting multiple screenings, multiple calendars and multiple students at one time in this report is a database intensive procedure. Selecting all calendars, all students and all screenings may increase the amount of time it takes to generate the report.

Which students would you like to include in the report?

Grade Ad Hoc Filter

All Students
 EC
 HK
 KA

Health Screenings Compliance Report Editor

Report Logic

- Information returned on this report is stored in the student's Health Screenings area. Data entered in a sub-screening (the panels that open when entering data for a selected screening

type) are counted on the report if data is entered into two or more attributes, unless otherwise noted. See the table below for attributes that trigger inclusion in the report. Sub-screenings that contain only a date are not included in the Have Screenings report.

- Note that inclusion on the report is based on the screening date entered on the sub-screening panels (except the Sports Physical and Early Childhood screenings), and not on the date of the screening.
- Leaving both date fields blank returns all screening records for students enrolled in the selected calendar, including records for dates outside that calendar.
- Entering only a From date includes records from that date forward.
- Entering only a To date includes records prior to that date.

Sub-screening Attributes that Trigger Inclusion in the Report

Because the names of the attributes can be modified by the district, the name of the field in the Attributes Used in Logic column is the attribute name and not the display name. All sub-screenings except Sports Physical must have data entered into at least two of the fields used in the Have or Do NOT Have logic.

Sub-screening Type	Attributes Used in Have or Do NOT Have Logic	Attributes displayed in Report
Sports Physical	physicalStatus	Status Comments

Report Editor Details

The following information details the available options on the Screening Compliance Report Editor.

Section	Description
Student Selection	The selection of a Grade level by which to pull students, or the selection of an Ad hoc Filter is required to generate the report. Also, an Enrollment Effective Date is required that will limit the report to students who were actively enrolled as of that date. This date is defaulted to the current date, but can be modified by entering a date in <i>mmdyy</i> format, or use the calendar icon to select a date.

Section	Description
Health Screening	<p>Select which health sub-screenings to include on the report and list students who have screenings within the entered date range who have screenings or who do not have screenings within the entered date range.</p> <p>For example, a list of students is needed to determine which students have not had a vision test during the current year. The radio button for Do NOT Have should be selected, and the date range with the start date of the first day of the school year through the current date should be entered. Then, select the Vision screening.</p> <p>A screening type must be chosen in order for the report to generate.</p>
Include individual screening comments	When marked, comments entered on the sub-screening editors print. These comments are visible when expanding a screening record on the student's Screenings tab.
Include guardian contact information	When marked, the names and contact information for the student's guardian(s) print. Contact information includes the household phone, cell phone, work phone or other phone, as entered on the person's Demographic Contact Information screen.
Sort Options	The report can be sorted by Student Grade Level , Student Name (alphabetical by last, first, middle name), Student Number (numeric order) or Homeroom Teacher (alphabetical by teacher name).
Calendar Selection	At least one calendar must be chosen for this report. If a calendar is selected in the Campus toolbar, that calendar will already be chosen in the list of calendars. Calendars can be selected by active year, by school or by year. Only those calendars to which the user is assigned calendar rights are available for selection.
Report Format	The printed format of the report. Options include: PDF or DOCX.

Generate the Report

1. Select the **Grade Level** of the students to include on the report. Or, select an already built **Ad hoc Filter** for a set of students.
2. Enter the **Enrollment Effective Date** in *mmddyy* format or use the calendar icon to select a date.
3. Select the school calendars to include in the report. The selection will be defaulted to the calendar selected in the Campus toolbar.
4. Select the **Health Screening** option of including students who **Have** or **Do Not Have** the selected screenings.
5. Enter a date range to narrow results in the **Screenings Within** date fields. This entry will only return students who have or do not have health screenings from the first entered date to the last entered date. This can be limited to the start and end dates of school years (from September 2009 to June 2010, for example). Dates should be entered in *mmddyy* format or use the calendar icon to select a date.

6. Select the appropriate health sub-screenings to include by marking the checkboxes next to the screening names.
7. Select the appropriate **Sort Options** - by Grade, Student Name or Student Number.
8. Select the **Report Format**.
9. Click the **Generate Report** button. The report will appear in a new window.
