Tool Search: Census by Birth Date

The **Census by Birth Date Report** provides a list of students within a birth date range, along with the students' dates of birth, student number, phone number, guardian information and address information. This report can be used by any school staff member to find a student's birthday.

The screenshot shows the 'Census by Birth Date' report editor interface. At the top, there is a search bar with the text 'Search for a tool or student'. Below the search bar, the page title is 'Census by Birth Date' with a star icon. The breadcrumb trail is 'Census > Reports > Census by Birth Date'. The main heading is 'Census By Birth Date'. Below this, there is explanatory text: 'Find all students entered in Campus Census with a birth date in the range specified and in selected school or calendar. When using the date option, start date indicates the date to start the search and the end date indicates the date to end the search. If no date is specified, the date is assumed to be today. When a month is selected, start and end dates will be ignored, and only students with birthdays in the selected month who have active enrollments on effective date will be reported. Primary household data will print for each student, along with data for any other households in which the student has a guardian (unless the Show Primary Household Information Only checkbox is selected)'. The form includes fields for '\*Start Date' and 'End Date', a dropdown for 'Select a birthday month:', an 'Effective Date' field with the value '02/07/2020', and two checkboxes: 'Show Birthday and Gender Information Only' and 'Show Primary Household Information Only'. The 'Report Format' is set to 'PDF'. A 'Generate Report' button is at the bottom.

*Census by Birth Date Report*

## Report Logic

This report orders students based on birth date. Primary household mailing address and phone information are listed for each student, in addition to all of the guardians (if any) in that household.

In addition to primary household information, secondary and non-primary household information is included for any household in which a student has a guardian. If only primary household information should be reported, the **Show Primary Household Information Only** checkbox can be selected on the report editor.

The **Effective Date** defaults to the current date and is used to find active enrollments. Only students who have active enrollments on the effective date are included in the report.

# Report Editor

Field	Description
<b>Start Date/End Date</b>	Entered date (in mm/dd/yyyy format) returns students born as of the entered date. For example, a start date of 04/01/2001 returns anyone with a birth date of April 1, 2001 through the entered End Date.
<b>Birthdate Month</b>	Selected date returns students with the selected birth month. There is no date range needed, and the Start and End date fields are ignored.
<b>Effective Date</b>	Entered date is used to return students who are actively enrolled as of the entered date.
<b>Show Birth and Gender Information Only</b>	When marked, only birth and gender information displays on the report, not household information.
<b>Show Primary Household Information Only</b>	When marked, only primary household information displays on the report. When not marked, all household information (primary, secondary, non-household contact) displays on the report.
<b>Report Format</b>	Indicates how the report generates - in PDF or DOCX formats.

# Report Generation

1. To look for students with birth dates in a particular date range, enter a **Start Date** in *mmdyy* format, or use the calendar icon to select a date.
2. If desired, enter an **End Date** in *mmdyy* format, or use the calendar icon to select a date. If no end date is entered, it defaults to today's date.
3. To look for birth dates using a **Birthdate Month** instead of a date range, select a month from the dropdown list. Selecting this option generates a report for all students who have a birthday in the selected month. If this option is used, any dates entered in the date range fields are ignored.
4. Enter an **Effective Date**. This field defaults to the current date and can be changed by entering another date in *mmdyy* format or use the calendar icon to select a date.
5. Mark the **Show Birthdate and Gender Information Only** checkbox to not display household and guardian information.
6. Mark the **Show Primary Household Information Only** checkbox to only display household information from the primary household. If not selected, all mailing addresses and phone numbers in which the student has a guardian are included in the report.
7. Select the desired **Report Format**.
8. Click the **Generate Report** button. The report displays in the selected format.
