Tool Search: SIRS Extracts

The Course extract reports course information for active courses.

Course Extract Editor

Report Logic

The Course extract reports courses where the Course > State Code is not null and is Active. This extract does not report inactive courses. All school year data is reported.

Extract Editor Fields

To generate the SIRS Extracts, use the following field descriptions to make the proper selections.

Field	Description
Extract Type	The SIRS Extract to generate.
Format	The format in which the report should generate. Options are State Format (CSV) and HTML. Use State Format for reporting information to the state and the other types for data review and verification.
Ad Hoc Filter	Selecting a filter limits the results to only those included in the filter.
Column Headers	Indicates whether Column Headers should be included in the report. This dropdown list applies to State Format (CSV).
Generate Extract/ Submit to Batch	Users have the option of submitting a report request to the batch queue by clicking **Submit to Batch** instead of immediately generating the report by clicking **Generate Extract**. The batch process allows larger reports to generate in the background without disrupting the use of Campus. For more information about submitting a report to the batch queue, see the Batch Queue article.
Select Calendars	Identifies which Calendar(s) should be included in the report. Calendars can be sorted by active year, by school or by year.

Course Report Layout

Element Name	Description	Campus Application
District Code	The code that identifies the district and its schools for reporting purposes. Reports the District Number Override when populated. When null, the prefix NY plus the State District Number reports. *Alphanumeric, 8 characters*	System Administration > Resources > District Information > State District Number District.number

Element Name	Description	Campus Application
Location Code	The code that identifies the location for reporting purposes. *Numeric, 4 digits*	System Administration > Resources > School > School > Location Code CustomSchool.value
School Year Date	Default date is June 30 of the reporting school year. For example, if the 1011 Calendar is selected, the School Year Date is 2011-06-30. *Date field, 10 characters, YYYY-MM-DD*	System Administration > Calendar > Calendar > Calendar > End Date Calendar.endDate
