Student Class Grade Detail

Report Logic

The following must be included on the [Course](#) in order for students to report:

- the course must have a [Grading Task](#) marked as State Reported.
- the State Code field must be populated.

Students report when:

- Students with a Score attached to a State Reported Grading Task.
- Students whose course has ended.
- Students who drop a course after attending any instructional time before their roster end date.

Students do NOT Report when:

- Students who drop a course before the first day of the course.
- Students who drop a course after the first day of the course but are absent for all possible instructional minutes before their roster end date.
- Students who are currently rostered as of the Effective Date and have not received a grade.
- Students assigned a grade that is mapped to the *Class Detail Outcome Code X: Do Not Report*.

Full Academic Year Date is ignored when generating this report.

When a student has multiple enrollment records to report for one calendar, a single record reports per course for the enrollment record that has the highest primacy ranking.

Type	Primacy
P: Primary	1
P: Primary with most recent enrollment Start Date	2
P: Primary with most recent enrollment Start Date and most recent End Date	3
S: Partial	4
S: Partial with most recent enrollment Start Date	5
S: Partial with most recent enrollment Start Date and most recent End Date	6
N: Sped	7
N: Sped with most recent enrollment Start Date	8
N: Sped with most recent enrollment Start Date and most recent End Date	9

Best Practice for Transfer Score Groups

The best practice for Transfer records is to have unique scores set up in the [Score Groups](#) and [Rubrics](#). When duplicate scores exist, for example, when two different Score Groups with a value of 60 where one value is marked as a passing score and one is not, the report cannot determine which 60 to report and randomly makes a selection. When duplicate values are required, it is best to make one unique by adding a special character such as 60*.

Extract Editor Field Descriptions

Field	Descriptions
Extract Type	The SIRS Extract to be run.
Effective Date	The date for which information reports.
Included State Grade Levels	Identifies the state grade levels to include in the report.
Format	The Format in which the report should generate. Options are State Format (CSV) and HTML. Use State Format for reporting information to the state and the other types for data review and verification.
Ad Hoc Filter	Selecting a filter limits the results to only those included in the filter.
Column Headers	Indicates whether Column Headers should be included in the report. This dropdown list applies to State Format (CSV).
Ignore Enrollment State Exclude	When Ignore Enrollment State Exclude is checked, enrollment records with State Exclude selected ARE included.
Include Transfer Transcript Records	When this checkbox is marked, all stand-alone transfer records for students enrolled in the selected calendar(s) are included when the following are true: <ul style="list-style-type: none"> • When a transcript record exists in a student's Transcript tool for a year tied to the same year as the calendar selected on the extract editor, AND • The transcript record is for a course that is not tied to a section offered in the school, as if it was added as a stand-alone transfer record and there was no section ID.
Generate Extract/ Submit to Batch	Users have the option of submitting a report request to the batch queue by clicking Submit to Batch instead of immediately generating the report by clicking Generate Extract . The batch process allows larger reports to generate in the background without disrupting the use of Campus. For more information about submitting a report to the batch queue, see the Batch Queue article.
Select Calendars	Identifies which Calendar(s) should be included in the report. Calendars can be sorted by active year, by school or by year.
