

## Ed-Fi v2.0 - Core Ed-Fi Data [.2231 - .2327]

Last Modified on 05/14/2025 10:02 am CDT

Tool Search: Ed-Fi Configuration

This article defines all of the elements of data sent per entity between Campus and the Ed-Fi system.

- - Data in schools and calendars marked as Exclude will not send data to Ed-Fi.
  - Person-related records do not trigger a send of data to Ed-Fi if the person does not have an Ed-Fi ID value assigned.
  - Ed-Fi ignores custom field data entered in Campus.

An entity is a collection of related data which is sent in a cluster of data elements from Campus to Ed-Fi. Select the following links to view what data elements are contained and sent within that entity:

## Understand Object Triggering Tables

The Object Triggering Logic Tables describe what actions within Campus result in data being triggered to sync to Ed-Fi.

Object Triggering Logic	
▼ Click here to expand...	
This table describes logic for triggering syncing of this object.	
Action	Trigger
Post	When a section is created and saved with a Room Number and Section Placement.  ⓘ • Room is required • Section Placement must be selected for the Term Type in order for data to send • If course is marked Inactive or State Exclude, data is not sent
Put	When Course information is changed and saved.
Delete	When a section is deleted.
Delete	When a section schedule placement is removed and saved.

Image 1: Example of an Object Triggering Logic Table

The following table lists the definition of each potential Action:

Action	Definition
<b>Post</b>	This will insert new records and data within Ed-Fi.
<b>Put</b>	This action will update existing information within Ed-Fi.
<b>Get</b>	This action is used for items that are pre-loaded. For example, Courses and Programs.
<b>Delete</b>	This will delete records and data within Ed-Fi.

## Understand Object Data Element Tables

The Object Data Element tables describe all of the elements contained within a reporting entity. Each element is given a description of what it is and any potential logic used to calculate the element, if the element is mandatory for reporting to Ed-Fi (indicated by an **M**), where the data is pulled from the Campus database and where the pulled information is entered within the Campus UI.

Elements marked as **M** are mandatory elements which must report data to Ed-Fi in order to meet reporting requirements. Elements marked as **O** are optional elements which are not mandatory for the Ed-Fi requirement but can be populated and report data for additional state-specific reporting purposes. Elements listed as **C** are conditional elements which are not required to report but will report data if the data is present within Campus.

Data Element Labels in bold are part of the Natural Key and are required data elements for data to send to Ed-Fi.

This column will indicate if the element is Mandatory, Optional or Conditional.

Object Data Elements

This table describes data elements sent within the Course Offering resource.	
Data Element	Description
<b>id</b>	The unique identifier of the resource.
<b>courseReference</b>	Reports the following elements that are part of the Natural Key for the <a href="#">Course</a> resource: • educationOrganizationReference • code
<b>schoolReference</b>	Reports the following elements that are part of the Natural Key for the <a href="#">Schools</a> resource: • schoolId
<b>sessionReference</b>	Reports the following elements that are part of the Natural Key for the <a href="#">Sessions</a> resource: • id • schoolReference • schoolYearTypeReference
<b>localCourseCode</b>	The local code assigned by the LEA or Campus that identifies the organization of subject matter and related learning experiences provided for the instruction of students.

## Understand Type/Descriptor Tables

The Type/Descriptor section describes each element and their corresponding Campus to Ed-Fi value translation that is occurring.

If the element is reporting a **Descriptor**, the **Ed-Fi Code Value** is reported.

If the element is reporting a **Type**, the **Ed-Fi Short Description** is reported.

This table describes the Ed-Fi Value mapped and reported for Session Type Descriptor:

Number of Terms in Term Schedule	Ed-Fi Code Value	Ed-Fi Short Description	Ed-Fi Description
1	FS	Full School Year	Full School Year
2	SE	Semester	Semester
3	TR	Trimester	Trimester
4	QR	Quarter	Quarter
5	QN	Quinmester	Quinmester
Any other number of terms not = to one above	XX	Other	Other

Session Type Descriptor      This element reports the Ed-Fi Code value based on the mapping provided in the Session Type Descriptor mapping provided below.

- Report the corresponding Term Type based on the sum of total terms in the term schedule. For example, if 4 terms are created in a Term schedule, a value of Quarter is reported.

This element reports the following additional information:

id	The unique identifier of the resource	N/A	N/A
----	---------------------------------------	-----	-----

## Entities and Elements

The following lists all the currently available and syncing entities and their respective elements.

### Calendar Dates

This entity represents a day in the school calendar.

#### Object Triggering Logic

▶ [Click here to expand...](#)

This table describes logic for triggering syncing of this object.

Days report by school not calendar in Ed-Fi, so when working with multiple calendars/schedule structures it is possible a day could be reporting even if it is not in the calendar you are working in.

Action	Trigger
Post	When a Day and/or a Day Event is created and saved or the Instruction checkbox is checked. <ul style="list-style-type: none"> <li>Days can be set either manually or by the Day Reset tool.</li> <li>Day Events can be set either manually or by the Multi Day Event Wizard.</li> <li>Send a record for each date that meets the reporting criteria.</li> <li>When there is more than 1 calendar/schedule structure, any day that has a day event will report. If the same day in multiple calendars has events that are not the same, all events will report.</li> <li>If the same day in different calendar/schedule structures has the same event, only 1 record will report.</li> <li>Do not send a record if the Calendar Exclude checkbox is checked.</li> </ul>
Put	When a Day Event or Duration is changed and saved.
Delete	When the Instruction checkbox is unchecked or a Day Event is deleted and saved. <ul style="list-style-type: none"> <li>When removing a day event there must only be one day event reported to send a delete. If there is more than one, it updates the day, not deletes.</li> </ul>

#### Scope Year Logic

▶ [Click here to expand...](#)

This table describes scope year logic of this object.

Logic
Reports the calendar dates in the scope year to which the calendar is aligned.
Data will only send for the years that have a valid configuration.
Future Years data will be suppressed until the Active Year is changed: <ul style="list-style-type: none"> <li>• This allows the Schedule Wizard to be used and reduces the number of records sent until the final schedule is completed.</li> <li>• A resync must be done after the Active Year is changed to send data.</li> </ul>

### Object Data Elements

## Class Periods

This entity represents the designation of a regularly scheduled series of class meetings at designated times and days of the week.

### Object Triggering Logic

► [Click here to expand...](#)

This table describes logic for triggering syncing of this object.

Action	Trigger
Post	When a Period Schedule is created and saved. <ul style="list-style-type: none"> <li>• A separate record will be sent for each Period Schedule/Period Name/Schedule Structure ID combination created.</li> <li>• Do not send records if the Calendar Exclude checkbox is marked.</li> <li>• Do not send a record if the School Exclude checkbox is marked.</li> </ul>
Post	When a Period Schedule Name or Period Name is changed and saved.
Delete	When a Period Schedule Name or Period Name is changed and saved.
Delete	When a Period Schedule or Period is deleted.

### Scope Year Logic

Data Element	Description	Campus Database Field	Campus GUI Location
id	The unique identifier of the resource.	M	N/A

Data Element	Description	Campus Database Field	Campus GUI Location
<b>educationOrganizationReference</b>	A reference to the related EducationOrganization resource. Reports the school number associated with the course.	M	N/A
<b>code</b>	The code that identifies the organization of subject matter and related learning experiences provided for the instruction of students.	M	Course.number Scheduling > Course > Number
title	The descriptive name given to a course of study offered in a school or other institution or organization. In departmentalized classes at the elementary, secondary, and post-secondary levels (and for staff development activities), this refers to the name by which a course is identified (e.g., American History, English III). For elementary and other non-departmentalized classes, it refers to any portion of the instruction for which a grade or report is assigned (e.g., reading, composition, spelling, and language arts).	M	Course.name Scheduling > Course > Name
numberOfParts	The number of parts identified for a course. The number in the SCED Sequence Part M field is reported. This field reports a default value of 1 for all courses if blank.	M	course.scedSequenceNum Defaults to 1 for all courses
academicSubjectDescriptor	The intended major subject area of the course. NEDM: Secondary Course Subject Area. See the Type/Descriptor table below. Reports the Ed-Fi code from the value selected in the SCED Subject Area dropdown. If SCED codes are not used or Ed-Fi Value is blank, it does not report.	O	Course.SCED Scheduling > Course > Courses > SCED Subject Area
description	A description of the content standards and goals covered in the course. Reference may be made to state or national content standards. This field does not report.	O	N/A N/A
dateCourseAdopted	The date the district adopted the course. This field does not report.	O	N/A N/A
highSchoolCourseRequirement	An indication that this course credit is required for a high school diploma. This field does not report.	O	N/A N/A
gpaApplicabilityType	An indicator of whether or not this course being described is included in the computation of the student's Grade Point Average, and if so, if it is weighted differently from regular courses. This field does not report.	O	N/A N/A
definedByType	Specifies whether the course was defined by the SEA, LEA, school or national organization. This field does not report.	O	N/A N/A
minimumAvailableCreditType	The type of credits or units of value awarded for the completion of a course. This field does not report.	O	N/A N/A
minimumAvailableCreditConversion	Conversion factor that when multiplied by the number of credits is equivalent to Carnegie units.	O	N/A N/A

Data Element	Description		Campus Database Field	Campus GUI Location
minimumAvailableCredit	The minimum amount of credit available to a student who successfully completes the course. This field does not report.	O	N/A	N/A

### Scope Year Logic

► [Click here to expand...](#)

This table describes scope year logic of this object.

Logic
Transcript records will send to each scope year where the student has a Student School Association, regardless of the Transcript School Year.
Data will only send for the years that have valid configuration.
A resync must be completed at the beginning of each year so that all years transcript records will be loaded in the ODS.

## Discipline Incident

This event entity represents an occurrence of an infraction ranging from a minor behavioral problem that disrupts the orderly functioning of a school or classroom (such as tardiness) to a criminal act that results in the involvement of a law enforcement official (such as robbery).

A single event (e.g., a fight) is one incident regardless of how many perpetrators or victims are involved. Discipline incidents are events classified as warranting discipline action.

## Section

This educational entity represents a setting in which organized instruction of course content is provided to one or more students for a given period of time. A course may be offered to more than one class/section. Instruction, provided by one or more teachers or other staff members, may be delivered in person or via a different medium.

This entity reports per section per term type combination.

## Sessions

This entity represents the prescribed span of time when an education institution is open, instruction is provided and students are under the direction and guidance of teachers and/or education institution administration. A session may be interrupted by one or more vacations.

In order to report properly, the Ed-Fi Term Type field needs to be populated on the Calendar Term Detail editor. This ties the Course Section to the Term. If the Course Section needs to use a different term type, the Ed-Fi Term Type Override field needs to be populated on the Course Section Editor.

### Logic

When using data in Campus that has an effective date, the following logic will be applied to determine the scope year(s) to report the data to.

- Current Year: Records will be compared to today's date to determine if the record is eligible to report.
- Previous Years: The record's date must be on or before the schools year's end date defined in the School Years editor. If blank, the default date of 6/30/yyyy is used.
- Future Years: The record's date must be on or after the schools year's start date defined in the School Years editor. If blank, the default date of 7/01/yyyy is used.

## Student Discipline Incident Association

This event entity represents an occurrence of an infraction ranging from a minor behavioral problem that disrupts the orderly functioning of a school or classroom (such as tardiness) to a criminal act that results in the involvement of a law enforcement official (such as robbery).

A single event (e.g., a fight) is one incident regardless of how many perpetrators or victims are involved. Discipline incidents are events classified as warranting discipline action.

## Student

Provide a summary of what the report/function will cover and the logistics around the data collection or reporting.

The Student Resource is a shared record among all districts. If two districts have the same student in the same year, the last district to trigger data to Ed-Fi is the data stored in Ed-Fi.

For example, if one district put in a first name of "Robert" and the second district put in a first name of "Rob", the last district to update the student record is what will appear in Ed-Fi and on both District's reports. This is true for all field logic in the Student Resource.

#### Object Triggering Logic

This table describes logic for triggering syncing of this object.

Action	Trigger
Post	<p>When an enrollment is created and saved for a person.</p> <ul style="list-style-type: none"> <li>Do not send a student record for an enrollment that is marked as State Exclude or No Show.</li> <li>Do not send a record if enrollment is in a calendar marked as State Exclude.</li> <li>Do not send a record if enrollment is in a school marked as State Exclude.</li> </ul>

Action	Trigger
Put	<p>When any student data is edited for the person in the Data Elements fields below.</p> <ul style="list-style-type: none"> <li>When the person's identity record is changed (elements: languages, yearOfEntry, raceAsOfDate, identificationCodes).</li> <li>When one of the person's household locations is changed (element: addressAsOfDate).</li> <li>When one of the person's household memberships is changed.</li> <li>When the person's FRAM Eligibility is changed (elements: schoolFoodServicesEligibilityDate, economicDisadvantaged).</li> <li>When a student's IEP is locked or unlocked and/or a student's disability is changed.</li> <li>When a student's contact information is changed: email, phone number</li> <li>When a student's EL information is changed (elements: limitedEnglishProficiencyDescriptor).</li> </ul>
Delete	Student records are never deleted because Student records are a shared resource among all districts.

## Additional Logic and Considerations

The following describes additional logic and considerations to be aware of when working with Ed-Fi.

<b>Attendance</b>	Only attendance that is "verified" will send to Ed-Fi. Unknown records marked by a teacher will not send. Negative attendance will send when it is given an excuse code.
<b>No Show/Excludes</b>	If the State Exclude or No Show buttons are marked or unmarked on an enrollment the record, they will be deleted/added from Ed-Fi.
<b>Required Fields</b>	The Room number on the Section editor will become required once Ed-Fi is enabled. This data is required for the section data to send to Ed-Fi. Do a check on all course sections prior to doing a resync on the Schedule Data to verify all sections have a Room number.
