Tool Search: Resolution Length Calculation Tool

The Resolution Length Calculation Tool allows you to manually recalculate the [Duration in School Days](#) value for all resolutions impacted by a change in the calendar after the resolution was created. This tool also generates a report detailing all Duration in School Days values modified during the recalculation.

Resolution Length Calculation Tool

The Resolution Length Calculation Tool is available to recalculate the Duration in School Days for resolutions impacted by a change in the calendar after the resolution was created. This tool should be run every time a calendar day is shortened or cancelled due to a weather or unforeseen event.

After the tool is run a report is returned listing all resolutions that were updated with their original Duration in School Days and the updated value for Duration in School Days.

Calculation Tool Options

Select Dates

Resolutions which overlap the selected date(s) will have the Duration in School Days field recalculated.

Generate the Report

To generate the report:

1. Enter the **Date Range**. Only resolutions which overlap the selected date range will have the Duration in School Days field recalculated.
2. Select a **Report Format**.
3. Select which **Calendars** will have Duration in School Days field data recalculated.
4. Click **Run Test**. This will run a test and generate a report of all Duration in School Days data that will be recalculated.
5. After reviewing the test run, select how the report will be generated:

Run	Immediately initiates recalculation of the Duration in School Days field for all behavior resolutions within the Calendar and Date Range selected and generates the report in the designated format.
Submit to Batch	The report is sent to the batch queue where it will generate at a scheduled time. To avoid any system performance issues, use this option when a large amount of data will be changed.

Understand Report Results

Use the table below to better understand each column of the report.

Data Element	Description	Format	Campus Application and Database
School	Name of the school reporting data.	Text	School & District Settings > Schools > School Information > Name School.name
State Student ID	Reports the unique identifier for a given student connected with the incident.	XXXXXXXXXX 10 digit number	Student Information > General > Summary > Student State ID Person.stateID
Last Name	The last name of the incident participant.	Text	Census > People > Demographics > Last Name Identity.lastName
First Name	The first name of the incident participant.	Text	Census > People > Demographics > First Name Identity.firstName
Incident Title	The title of the behavior incident.	Text	Behavior Office > Behavior Management > Behavior Management Tool > Incident > Title BehaviorIncident.incidentTitle
Incident Date	The date the behavior incident occurred.	DD/MM/YYYY (e.g. 11/24/2012) Leading zeros are not included in CSV format (e.g. 9/9/2012)	Behavior > Behavior Management > Behavior Management Tool > Incident > Date BehaviorIncident.incidentDate

Data Element	Description	Format	Campus Application and Database
Event ID	The unique behavior event ID for the behavior incident.	XXXXX Numeric, varying lengths.	Behavior > Behavior Management > Behavior Management Tool > Incident > Event ID
Behavior Type	The local district behavior event type for the behavior incident.	Text	Behavior > Behavior Management > Behavior Management Tool > Incident > Event Type BehaviorType.name
Resolution ID	The unique resolution ID for the behavior incident.	XXXXX Numeric, varying lengths.	Behavior > Behavior Management > Behavior Incident Manager Tool > Incident > Resolution ID BehaviorResolution. ResolutionID
Resolution State Code	Indicates if the incident resulted in a state resolution.	Alpha- numeric code (e.g. SSP1)	Behavior > Behavior Management > Behavior Incident Manager Tool > Incident > Resolution > State Code BehaviorResType. stateResCode

Data Element	Description	Format	Campus Application and Database
Resolution Type	The local district resolution type for the behavior incident.	Text	Behavior > Behavior Management > Behavior Management Tool > Incident > Resolution > Resolution Type BehaviorResType. resolutionName
Resolution Start Date	The start date of the behavior resolution.	DD/MM/YYYY (e.g. 11/24/2012) Leading zeros are not included in CSV format (e.g. 9/9/2012)	Behavior > Behavior Management > Behavior Management Tool > Incident > Resolution > Resolution Start Date BehaviorResolution. timestamp
Resolution Start Time	The start time of the behavior resolution.	HH:MM AA Alpha-numeric, leading zero for the hour is not included in CSV format (e.g. 9:15 AM)	Behavior > Behavior Management > Behavior Management Tool > Incident > Resolution > Resolution Start Time BehaviorResolution. timestamp

Data Element	Description	Format	Campus Application and Database
Resolution End Date	The end date of the behavior resolution.	DD/MM/YYYY (e.g. 11/24/2012) Leading zeros are not included in CSV format (e.g. 9/9/2012)	Behavior > Behavior Management > Behavior Management Tool > Incident > Resolution > Resolution End Date BehaviorResolution. endtimestamp
Resolution End Time	The end time of the behavior resolution.	HH:MM AA Alpha-numeric, leading zero for the hour is not included in CSV format (e.g. 9:15 AM)	Behavior > Behavior Management > Behavior Management Tool > Incident > Resolution > Resolution End Time BehaviorResolution. endtimestamp
Previous Duration in School Days	The Duration in School Days for the resolution prior to the Resolution Length Calculation Tool being run. 	##.## Numeric	Behavior > Behavior Management > Behavior Incident Manager Tool > Incident > Resolution > Duration in School Days BehaviorResolution. SchoolDaysDuration
Current Duration in School Days	The current value in the Duration in School Days for the resolution (the value calculated after the Resolution Length Calculation Tool was run).	##.## Numeric	Behavior > Behavior Management > Behavior Incident Manager Tool > Incident >

Data Element	Description	Format	Resolution > Campus Application and Database
	<p>The Duration in School Days is calculated as follows:</p> <ul style="list-style-type: none"> • The Duration in School Days is calculated to the hundredth of the Standard Day Minutes. • Resolutions that span multiple days will calculate the amount missed per day and sum the totals together. • Resolution minutes need to be calculated per day for the calendar in which the resolution takes place. Standard Day Minutes can vary on different days. • Duration is based on the period schedule assigned each day of the resolution. • Resolutions that extend beyond the calendar will only calculate Duration in School Days through the end of the calendar. • A Resolution End Time of blank is assumed to be 12:00 A.M. 		<p>BehaviorResolution. SchoolDaysDuration</p>

The screenshot shows the 'Add Resolution' dialog box. The 'Resolution Details' section includes a dropdown for 'Resolution Type' (set to 'Letter Sent'), a date field for 'Resolution Assign Date' (06/19/2012), and date/time fields for 'Resolution Start Date' (06/19/2012) and 'Resolution Start Time' (10:34 AM). The 'Duration in School Days' field is highlighted with a red box and an arrow. Below this is a dropdown for 'Behavior Admin Staff Name' (set to 'Sarah Johnson'). The 'Details' section is a text area. The 'Apply To' section shows '03L Lotering' and 'Sarah Johnson'. At the bottom are 'Save' and 'Close' buttons.
