

Homeless (Tennessee)

Last Modified on 12/14/2025 8:45 pm CST

The Homeless tab records basic homeless information as well as district-defined fields.

See the [Core Homeless](#) article for more information.

The screenshot shows the 'Homeless' tab in the Infinite Campus system for Tennessee. The top navigation bar includes 'Student Information > Program Participation > Homeless'. The main content area displays a list of homeless records with columns for Start Date, End Date, Program Status, Homeless Nighttime Residence, Unaccompanied Youth, McKinney Vento status, and Created By. A detailed view of a record is shown in a modal window, including fields for Start Date, End Date, Program Status, Homeless Nighttime Residence, Unaccompanied Youth, McKinney Vento status, Comments, Referral Source, Parent Eligibility Notice, Preschool Sibling Count, Enroll Dispute, Permanent Housing, and more. The modal is titled 'Homeless Detail'.

Homeless Program - Tennessee

The list of homeless records is sorted by Start Date.

Previously, homeless fields were stored on the Enrollment tab. Using a separate homeless tab allows these records to have more accurate dates representing the student's period of homelessness.

The homeless tab includes the following fields:

| Field | Description |
|-------------------------------------|--|
| Homeless Nighttime Residence | The nighttime residence of the homeless student. |

| Field | Description |
|----------------------------|---|
| Unaccompanied Youth | Indication of whether the student is unaccompanied by a parent/guardian. |
| McKinney Vento | Indication of whether the homeless student is being served by a McKinney-Vento program. |
| Start Date | The first day the student was considered to be homeless. |
| End Date | The last day the student was considered to be homeless. |

Custom Fields and Tabs

Districts have the option of adding district-specific elements to the Homeless tab or district-specific tabs.

The [Custom Attribute](#) article explains how to add a field to the Homeless tab. Select *Homeless* as the **Screen Location**.

See the [Custom Tab](#) article for instructions on adding a district-specific tab. Select *Homeless* as the **Tabset** and then use the [Custom Attribute](#) tool to add fields to the tab.
