## Tool Search: Transportation

This article only pertains to Districts that have enabled the new Transportation 2.0 tool. Once the Transportation 2.0 tool has been turned on, it can not be reverted back.

The student Transportation tool provides a space for users to record a student's transportation information. From here, users are able to define a student's bus stop(s), bus(es) used during the school day, typical arrival/departure times and the amount of miles transported per day.

The information below contains fields specific to Oklahoma. See the core [Student Transportation](#) article for information on entering routes, requests, and parking details.
