State Reporting Transportation Fields for Minnesota

Tool Search: Transportation

Please note, Minnesota State reporting logic will need to be updated through an RX after the Transportation 2 Module is released on June 30, 2025. This will take some time. We are advising Minnesota Districts <u>not</u> to enable the Transportation 2 module until after the planned RX is released and taken. Enabling the new module before taking the planned RX will cause state reporting errors for transportation and other state reports.

This article only pertains to Districts that have enabled the new Transportation 2.0 tool.

The Transportation tool allows districts to show a student's transportation information for the day, record the bus routes students are assigned to and from school, create transportation requests, and record information for vehicles students drive to and from school. Additional Route Types can be added via the <u>Core Attribute/Dictionary</u> and additional custom fields can be added to Routes, Requests, and Parking via the <u>Custom Attribute/Dictionary</u>.

See the core <u>Transportation 2.0</u> article for information about the core features of the Transportation 2.0 tool.

Adding State Reporting Information

These instructions outline the required fields. Complete any of the additional fields as needed by the district.

- 1. Under the State Reporting section, click New. The Transportation Student panel will appear.
- 2. Select the **Transportation Category** for the student.
- 3. Select the Transporting District.
- 4. Select the **Enrollment** that the Transportation record pertains to.
- 5. Enter the **Start Date** for the Transportation record.
- 6. Click Save.
