The Grading Changes Not Pushed report lists changes to grading setup that could not be pushed from the course master to the course for various reasons. These reasons include:

- Assignments and scores aligned to tasks, standards, or grade calc options that were removed or marked as post-only at the course master level.
- Differences in composite grading setup that would affect scores.

The screenshot shows the Infinite Campus interface for the 'Grading Changes Not Pushed' report. At the top, there is a search bar and a breadcrumb trail: 'Grading & Standards > Reports > Grading Changes Not Pushed'. Below this is a blue header bar with the title 'Grading Changes Not Pushed Report'. A descriptive paragraph explains that the report lists categories, grading tasks, and standards that had assignments, scores, or grade calc options aligned when they were removed or marked post-only at the Course Master level. It also includes Course Master composites that exist on a different parent Grading Task or Standard in the Course as well as Course Master parent/child composite combinations that exist in the Course. They cannot be removed or updated at the Course/Section level. The report will run against all school calendars that pertain to the selected Course Master and reports based on the School Year selected in the toolbar.

Below the description, there are two selection areas:

A note indicates 'CTRL-click or SHIFT-click to select multiple'.
