Tool Search: Grading Changes

The Grading Changes Not Pushed report lists changes to grading setup that could not be pushed from the course master to the course for various reasons. These reasons include:

- Assignments and scores aligned to tasks, standards, or grade calc options that were removed or marked as post-only at the course master level.
- Differences in composite grading setup that would affect scores.

The **Reason** column lists why the grading changes could not be pushed. Reasons include:

- Assignment - the modified item already has an assignment aligned at the section level.
- Scores - the modified item already has scores or grades aligned at the section level.
- Exists as a composite - the modified grading task has been selected as a child task in composite grading setup.
