[School Days Extract Layout](#)

Tool Search: SD Extract

This information is current as of the Campus.2527 (June 2025) release.

The School Days Extract details the school days of the selected calendar(s). To generate this extract, select **School Days** from the Extract Type field on the [SD Extract](#) editor. This extract reports one record per day considered a calendar day when school is open.

SD Extract - School Days

Special Education data reports from multiple places. Depending on the selected school year, data reports from different areas.

When the selected school year is 2024-25 or earlier, Special Education information reports from the student's Enrollment record for that year.

When the selected school year is 2025-26 or later, Special Education information reports from the Evaluation, Plan, Summary, and Enrollment data. For each field on the report, a logic check is performed in the following order:

1. **Evaluation** - the most recent Start Date that is on or before the effective date if one is selected (or December 1 of the selected school year if one is not selected) and not more than three years in the past, AND has a locked status.
2. **Plan** - the most recent start date that is on or before the effective date if one is selected (or December 1 of the selected school year if none is selected) and not more than one year in the past, AND has a locked status.
3. **SPED Summary** - the start date is on or before the effective date if one is selected (or

December 1 of the selected school year if none is selected) and does not have an end date. When that is not found and there is summary data with a start date that is on or before the effective date if one is selected (or December 1 of the selected school year if none is selected) and the end date is after the effective date if one is selected (or December 1 of the selected school year if none is selected).

School Days Extract Layout

The following tables describe the fields which appear in the School Days Extract.

Header Record

| Name | Length | Code/Format | Description |
|--------------------|--------|-------------|---------------------------|
| Record Type | 2 | "HD" | Always the value "HD" |
| Date | 10 | MM/DD/YYYY | Date report was generated |
| Time | 8 | HH:MM:SS | Time report was generated |
| Version | 15 | "SD2.0" | Always the value "SD2.0" |

School Days Records

| Element Name | Description | Location |
|------------------------|--|---|
| Record Type | Type of record being generated. In this case, always a value of "DY". <i>Alphabetic, 2 characters</i> | Data not stored |
| District Number | State-assigned district identification number. <i>Numeric, 5 digits</i> | District Information > District Number District.number |
| School Number | State-assigned school identification number. <i>Numeric, 2 digits</i> | District Information > State School Number School.number |
| Year | The end year of the calendar. <i>Date field, 4 characters (YYYY)</i> | Calendar Information > End Year Calendar.endYear |

| Element Name | Description | Location |
|--------------------------|--|--|
| Calendar Number | Number assigned to the calendar. Needs to match calendar number in associated SD-Extract-School Calendar file. <i>Numeric, 3 digits</i> | Calendar Information > CalendarID Calendar.number |
| Date | A day record for each day in the calendar. <i>Date field, 10 characters (MM/DD/YYYY)</i> | Days Setup > Date day.date |
| Instructional Day | Indicates whether instruction was given to students on selected date. <i>Alphabetic, 1 character (Y or N)</i> | Days Setup > Day Detail > Instruction Day.instruction |
| School Day | Indicates if the school was open on selected date (<i>i.e.</i> teacher in-service day will have Instruction = N and School Day = Y). <i>Alphabetic, 1 character (Y or N)</i> | Days Setup > Day Detail > School Day Day.schoolDay |
| Attendance Day | Indicates if there is attendance for selected date. <i>Alphabetic, 1 character (Y or N)</i> | Days Setup > Day Detail > Attendance Day.attendance |
| Day Duration | Number of minutes of instruction offered on selected date. <i>Numeric, 3 digits</i> | Days Setup > Duration Day.duration |
