[School Days Extract Layout](#)

Tool Search: SD Extract

This information is current as of the Campus.2527 (June 2025) release.

The School Days Extract details the school days of the selected calendar(s). To generate this extract, select **School Days** from the Extract Type field on the [SD Extract](#) editor. This extract reports one record per day considered a calendar day when school is open.

23-24 Mike Miller Elementary
23-24 New Beginnings
23-24 O.M. Tiffany Elementary
23-24 Priv Aberdeen Christian
23-24 Priv Head Start

SD Extract - School Days

Special Education data reports from multiple places. Depending on the selected school year, data reports from different areas.

When the selected school year is 2024-25 or earlier, Special Education information reports from the student's Enrollment record for that year.

When the selected school year is 2025-26 or later, Special Education information reports from the Evaluation, Plan, Summary, and Enrollment data. For each field on the report, a logic check is performed in the following order:

1. **Evaluation** - the most recent Start Date that is on or before the effective date if one is selected (or December 1 of the selected school year if one is not selected) and not more than three years in the past, AND has a locked status.
2. **Plan** - the most recent start date that is on or before the effective date if one is selected (or December 1 of the selected school year if none is selected) and not more than one year in the past, AND has a locked status.
3. **SPED Summary** - the start date is on or before the effective date if one is selected (or

December 1 of the selected school year if none is selected) and does not have an end date. When that is not found and there is summary data with a start date that is on or before the effective date if one is selected (or December 1 of the selected school year if none is selected) and the end date is after the effective date if one is selected (or December 1 of the selected school year if none is selected).

School Days Extract Layout

The following tables describe the fields which appear in the School Days Extract.

Header Record

Name	Length	Code/Format	Description
Record Type	2	“HD”	Always the value “HD”
Date	10	MM/DD/YYYY	Date report was generated
Time	8	HH:MM:SS	Time report was generated
Version	15	“SD2.0”	Always the value “SD2.0”

School Days Records

Element Name	Description	Location
Record Type	Type of record being generated. In this case, always a value of "DY". <i>Alphabetic, 2 characters</i>	Data not stored
District Number	State-assigned district identification number. <i>Numeric, 5 digits</i>	District Information > District Number District.number
School Number	State-assigned school identification number. <i>Numeric, 2 digits</i>	District Information > State School Number School.number
Year	The end year of the calendar. <i>Date field, 4 characters (YYYY)</i>	Calendar Information > End Year Calendar.endYear

Element Name	Description	Location
Calendar Number	<p>Number assigned to the calendar. Needs to match calendar number in associated SD-Extract-School Calendar file.</p> <p><i>Numeric, 3 digits</i></p>	<p>Calendar Information > CalendarID</p> <p>Calendar.number</p>
Date	<p>A day record for each day in the calendar.</p> <p><i>Date field, 10 characters (MM/DD/YYYY)</i></p>	<p>Days Setup > Date</p> <p>day.date</p>
Instructional Day	<p>Indicates whether instruction was given to students on selected date.</p> <p><i>Alphabetic, 1 character (Y or N)</i></p>	<p>Days Setup > Day Detail > Instruction</p> <p>Day.instruction</p>
School Day	<p>Indicates if the school was open on selected date (<i>i.e.</i> teacher in-service day will have Instruction = N and School Day = Y).</p> <p><i>Alphabetic, 1 character (Y or N)</i></p>	<p>Days Setup > Day Detail > School Day</p> <p>Day.schoolDay</p>
Attendance Day	<p>Indicates if there is attendance for selected date.</p> <p><i>Alphabetic, 1 character (Y or N)</i></p>	<p>Days Setup > Day Detail > Attendance</p> <p>Day.attendance</p>
Day Duration	<p>Number of minutes of instruction offered on selected date.</p> <p><i>Numeric, 3 digits</i></p>	<p>Days Setup > Duration</p> <p>Day.duration</p>
