[Course Master Workflow | Push All Courses](#)

Tool Search: Push All Courses

The Push All Courses tool pushes grading setup to all course sections in the calendar selected in the Campus toolbar. To push data for an individual course, use the Push to Sections option on the [Course Information](#) tool.

Districts should use caution pushing changes to sections once classes are in session as changes may affect grade calculations.

Push All Courses ☆ Grading & Standards > Grading & Standards Administration > Push All Courses

Push All Courses

This tool batch pushes categories, composite grades, and grade calc options for all courses to sections for the current calendar year. This tool will not add duplicated categories.

Note: Quartz must be enabled to submit batch jobs. If the job does not appear in the Batch Queue List after submitting, Quartz is likely disabled.

To view a report of all the data being pushed from courses to sections, click the link below:
[Courses Awaiting Push](#)

Data to be pushed:

- Categories
- Overwrite Categories
- Grade Calc Options
- Composite Grades
- Composite Weights
- Advisory

Push All Courses

A calendar must be selected in the Campus toolbar prior to making a push request. Data is pushed for all courses in the selected. calendar.

1. By default, **Categories**, **Grade Calc Options**, **Composite Grades** and **Weights**, and **Advisory** are selected to be pushed to sections. Unmark any items to remove them from the push request. Additionally, mark **Overwrite Categories** to replace section-level categories with course-level ones.
2. Click **Submit to Batch**. Because these push requests often involve a large amount of data, submitting requests to the batch queue allows the request to be processed in the background without interrupting system performance. Records of completed requests are available in the Batch Queue List. A notification is sent when the request is completed.

Additional Information

- Be aware that changes to calculations in Grade Calc Options and Composite grading may result in changes to students' grades once classes are in session.
 - If a category pushed from a course and a category created by the teacher in the section have the same name, the teacher's category is appended with (1) to distinguish it from the category from the course.
 - Categories pushed to sections are locked from editing by teachers.
-
