

# Transcripts (Maine)

Last Modified on 12/14/2025 8:45 pm CST

## Tool Search: Transcript

A transcript is a historical record of a student's performance in a course. The information printed on the transcript can vary from district to district depending on district preferences. Each district records grading information that students receive on transcripts and report cards. Grading information is connected to the course schedule of a student. Transcript fields that are specific to the state of Maine are described below. For all other inquiries, please visit the [Transcript \(Counseling\)](#) article.

Much of the data that appears in the Transcripts tab is auto-populated from other areas of the software. Users may change the value of these fields within Transcripts. However, be aware that making a change here, does NOT change the value of the originating field. For this reason, modifying posted Transcript records may cause discrepancies in records.

## Additional Information

Additional Information fields provide further details on the transcript entry, and includes localized fields (used for state reports) and district-defined fields (created by the district) This section is collapsible or expandable by clicking the minus/plus sign on the right-hand side.
