Ed-Fi v3.X - Sections Resource Preferences

Last Modified on 10/21/2024 8:22 am CDT

Tool Search: Ed-Fi Configuration

The Ed-Fi Configuration tool is used to establish Ed-Fi data resources.

State specific information: Nebraska

The following describes how to set the resource preferences for the Sections resource. If the Configure or Edit buttons do not display, then the resource does not need to be mapped and the toggle button can be used to turn the resource on or off.

 If a mapping is changed, a resync must be performed on the resource in order for the new mappings to send correctly.

1. Select the appropriate **Ed-Fi Code** for the Educational Environmental Types. The **Show Inactive** button can be used to show Educational Environmental Types that are not active.

   Any item not mapped will not report to Ed-Fi.

Education Environment Descriptors	
Attribute Dictionary	System Administration > Custom > Attribute Dictionary > Section > Instructional Setting
UI Location	Course > Section > Instructional Setting

Section Delivery Descriptors

2. Click **Save.**
