

State Enrollment Verification Report

Last Modified on 05/26/2026 3:59 pm CDT

Tool Search: State Enrollment Verification Report

This report allows a district to compare its local student enrollment data to that existing at the state level. It should be generated regularly to promote early identification of gaps and inconsistencies in student enrollment data.

Comparing this report's results with those of the State Person Identity Verification Report may help in troubleshooting enrollment issues, as proper person/identity syncing is a precursor to enrollment syncing.

State Enrollment Verification Report ☆
Student Information > Reports > State Enrollment Verification Report

Enrollment Verification Report

This report will communicate with the state edition server to compare local enrollments with the data that exists at the state. It will then generate a report that summarizes any differences.

Report Format

This report is only applicable to users who operate at the district level of a Campus State Edition product.

A BIE-specific report exists. See the [State Enrollment Verification Report \(BIE\)](#).

Page 1

See the [Student Information Reports](#) Tool Rights article for the tool rights needed to generate this report.

The State Enrollment Verification Report layout includes the option to generate three sets of data for comparison:

- Enrollment data existing at the district level, but not at the state level
- Enrollment data existing at the state level, but not the district level
- Enrollment data existing at both the district and state levels, but containing inconsistencies or mismatched information

A summary of the number of enrollments for each of the three data sets will also be returned.

Data within this report is also available within the [Verification](#) tool of the Data Interchange folder.

Report Logic

The logic used to generate results for this report is the same logic used for the [Resync State Data Tool \(District\)](#).

The report identifies people who have a district enrollment record that would sync to the state if a resync were performed. Identification of missing/incorrect records is based on students' enrollmentGUID.

Report Editor

The report options page is broken into four areas that control the data sets returned by the report.

Option	Description
--------	-------------

Option	Description
<p>Select Which Enrollments To Include</p>	<p>Indicates which enrollments are included in the report.</p> <p>To compare local enrollment records with the enrollment records at State Edition:</p> <ol style="list-style-type: none"> 1. Verify that the Selected School Year field reflects the proper year for the report. If reporting on the 2018-19 school year, 2019 should be displayed in field. This field auto-populates with the ending year of the school year selected in the Year field of the current user's Campus toolbar. 2. Select the School(s) to include in the the report results. Select multiple schools by holding the CTRL key while clicking, or select the All Schools options to select all schools within the district. 3. Select the State Grade level(s) to include in the report. Select multiple grade levels by holding the CTRL key while clicking, or select the All Students options to select all students, regardless of grade level. <p>The grade levels list is based on the state grade levels that have been mapped to district grade levels. The local district grade levels must be mapped to the same state grade code at both the district and state levels for report totals to be accurate.</p>

Show Value at District and State of Each Difference	Displays the details of values that differ between the district and state levels.
Field	Description														
Show Summary Totals	Displays a summary page with general error totals														
Show Enrollment Missing at State	Displays all district-level enrollment records that do not exist at the state level.														
Identify Students Missing at State Due to Overlap Prevention	Displays all enrollment records that do not exist at the state because they overlap with another district's enrollment record. This checkbox is intended for use in states where overlap syncing is not allowed, based on the "Strict Prevent with Syncing" option selected from the Enrollment Overlap Behavior field of the state-level System Preferences .														
Show Enrollments Missing at District	Displays all state-level enrollment records that do not exist at the district level.														
Show Enrollments with a Field Difference	Displays all records that differ between district and state levels.														
Show Value at District and State of Each Difference	Displays the details of values that differ between the district and state levels.														
Report Format	Selection determines the desired format for the report - PDF, CSV or DOCX.														

Generate the Report

Data on this report is queried and presented in the report; it is not stored in the database.

1. Select the enrollments to include by selecting the **School Year, Schools** and **State Grade** levels.
2. Mark which enrollment information to exclude from the report.
3. Mark which enrollment information to include in the report.
4. Select the desired **Report Display Options**.
5. Select the desired format of the report.
6. Click the **Generate Report** button. The report displays in the selected format.

For the PDF and DOCX formats, If the **Show Summary Totals** checkbox was marked, the first page of the report is a summary page, containing data error totals. The subsequent pages of the report will contain details on mismatched data.

18-19 Traditional High <small>Generated on 03/19/2019 01:55:41 PM Page 1</small>	Enrollment Verification Report <small>Comparison of District Enrollment Data With State Data COUNTY PUBLIC SCHOOLS Verified: 03/19/2019 13:55</small>
--	--

Enrollment Verification Results

The Enrollment Verification will compare all enrollment records existing at the district and state in the school year selected for verification. The Details column of the report may suggest a reason related to record differences.

Enrollment Sync Rules

Local and/or state-level settings may intentionally prevent syncing of certain enrollments. The following criteria can prevent enrollments from syncing:

- Individual Enrollment marked as state exclude
- Grade Level marked as state exclude
- System Preference - Enrollment Overlap Behavior ("Strict Prevent with Syncing" value only)
- System Preference - Accept State Excluded Grade Levels and Enrollments ("No" value only)
- Unmapped State/Regional Grade Levels

The success of Enrollment object syncing depends on the successful syncing of these parent objects:

1. District
2. School
3. Calendar
4. ScheduleStructure
5. StructureGradeLevel
6. PersonIdentity
