

RTI Interventions

Last Modified on 04/09/2025 3:25 pm CDT

Tool Search: RTI Interventions

Interventions are set up to provide teachers and staff a set of predefined interventions they can select and use when setting up an RTI plan for a student. For example, a school has established an intervention for Behavior, Tier 2 requiring the student to use a Check In/Check Out attendance sheet.

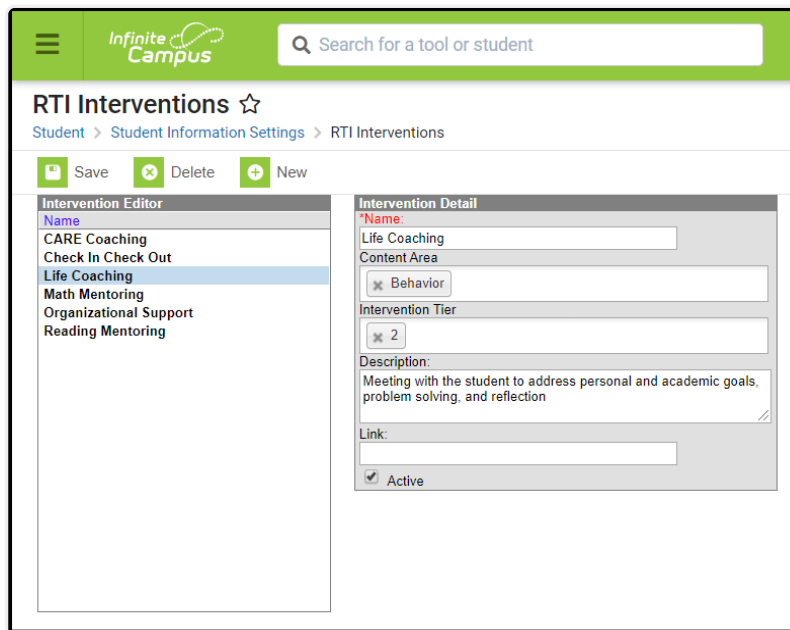

Image 1: RTI Interventions

See the [RTI Interventions Tool Rights](#) article for information related to tool rights for this tool.

Prerequisites

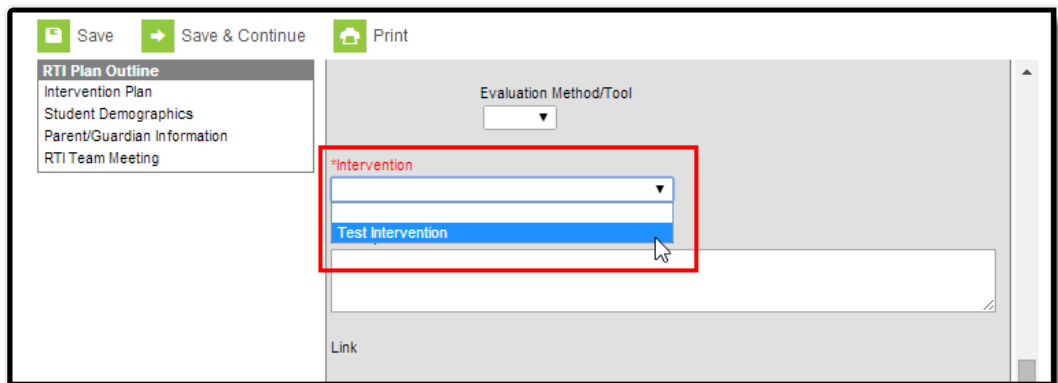

[RTI Plan Types](#) must be established (preferably for all Content Areas).

Create RTI Interventions

1. Select the **New** button. The Intervention Detail editor will appear on the right.
2. Enter the **Name** of the intervention.
3. Enter the **Content Area(s)**. This is important as it ties the intervention to plan types of this same Content Area. The intervention is only available for selection in RTI plans using a plan

type which has this same content type.

4. Enter the **Intervention Tier**.
5. Enter a Description of the intervention. This should describe the nature of the intervention and/or any instructions for the user when performing this intervention.
6. Enter a **Link** (if available). This should be a URL link to any materials or websites that should be accessed when performing this intervention.
7. Click the **Save** button. This intervention is now available for teachers and staff to select when [creating an RTI plan](#) for a student (see Image 2).

The screenshot shows a web form titled "RTI Plan Outline" with a sidebar menu containing "Intervention Plan", "Student Demographics", "Parent/Guardian Information", and "RTI Team Meeting". The main form area has a header with "Save", "Save & Continue", and "Print" buttons. Below the header is a section for "Evaluation Method/Tool" with a dropdown menu. A red box highlights the "Intervention" dropdown menu, which is currently open and showing "Test Intervention" as the selected option. Below the dropdown is a text area for "Link".
