Tool Search: Student Interchange

The School Association Report lists all students enrolled in the selected calendar as of the entered effective date in grades EE-12. Any incident of mobility (entry, exit, grade change, etc.) for each school within the LEA at any point in the currently selected school year should be submitted. Since the SSA file contains funding information, a Local Education Agency (LEA) must have a record at this level. A student must have at least one record and may have multiple records at the school level.

## Report Logic

[Attendance Calculations](#) | [Continuous in District and School](#) | [Non-Binary Gender Reporting](#)

Students are included in the report when a student has a primary enrollment in a state grade with

an enrollment start date that is before the Effective Date. When the **Include Partial Enrollments** checkbox is marked on the Extract Editor, partial enrollments in the selected calendar are also included.

Students are not included in this report when:

- Enrollment records are marked as No Show.
- Enrollment records are marked as State Exclude.
- Grade level is mapped to a state grade level of 002.
- Grade levels are marked as State Exclude.
- Calendars in which the student is enrolled are marked as State Exclude.

When the student's Start Status is 00: No/Not Applicable - summer dropouts only (reported in field 10, Entry Type) and when the student's End Status is 40: Discontinued schooling/dropped out (reported in field 12, Exit/Withdraw Type), these fields report as zeros up to the length of the field:

- Field 3, School Code (4 digits)
- Field 8, Entry Date (8 digits)
- Field 11, Exit/Withdraw Date (8 characters)

## Attendance Calculations

This report uses the Attendance Day Aggregation table for calculating attendance. See the following articles for more information on this table:

- [Attendance Aggregation Preferences](#)
- [Attendance Aggregation Refresh](#)

## Continuous in District and School

A student is considered **continuous in district** as long as the student had a primary enrollment as of the **Continuous in District Dates** and any primary enrollment from that date to the end of the school term, as long as the student was enrolled in all *instructional* days to the end of the school term. Multiple primary enrollments must be considered.

A student is considered **continuous in school** as long as they had a primary enrollment as of the **Continuous in District Dates** and any primary enrollment from that date to the end of the school term as long as the student was enrolled in all *instructional* days to the end of the school term. Multiple primary enrollments must be considered.

When the Continuous in School value reports as a 1 for a student, the Continuous in District value also reports as a 1.

Override fields exist on the [state reporting enrollment editor](#). Values chosen in those fields report. When there are no values chosen, the report follows this logic:

Reported Value	Reporting Population

## Non-Binary Gender Reporting

Schools can assign students a gender of M: Male, F: Female or N: Non-binary. This is done on the [Identities](#) tool and/or the [Demographics](#) tool.

Data Pipeline Extracts and other required extracts use the Legal Gender field included in the Protected Identity Information to report student identity information.

To properly record a gender of N: Non-Binary, on the Identities tool:

1. Assign the **Gender of N: Non-Binary** in the standard identify fields.
2. Assign the **Protected Identity Information Legal Gender** field to M: Male, F: Female or N: Non-Binary.
3. Save the record when finished.
