PIMS Student Snapshot

See the PIMS Reporting article for additional PIMS Reporting information.

Report Logic

The Student Snapshot Template reports records for all actively enrolled students as of the entered Effective Date. This report is the same as the Student Template except it includes the Reporting Date field. Only students with a primary enrollment report. Student enrollments marked as State Exclude do not report.

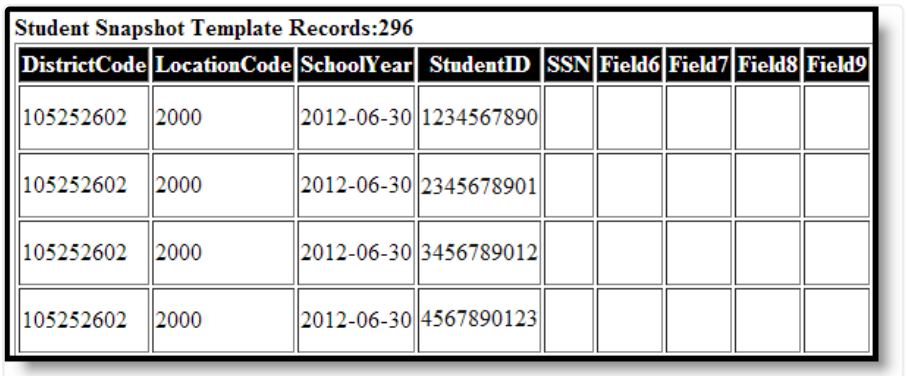

Report Editor

Field	Description
Extract Type	Determines the type of PIMS Extract being generated.
Effective Date	Entered date causes the extract to report all students actively enrolled as of that date and/or all data as of this date. This date entered is considered the end date of the reporting period, unless it is a snapshot extract.

Field	Description
Format	Determines how the extract generates. Extracts can be generated in State Format (comma delimited) or HTML. Use the HTML format for reviewing and verifying data prior to submission to the state. Use the State Format for submitting the data to the Department of Education.
Report Protected Identities	When marked, last name, first name, middle name, suffix, and gender information reports from the Protected Identity Information section on the Identities editor, when the fields are populated.
Report All Addresses	When marked, address fields included in the report (Address 1, Address 2, City, State, Zip) report for each student record. When not marked, address information only reports for Special Education and CTE students only.
Ad hoc Filter	Select an existing ad hoc filter from which to report students. Only those students included in the **Student** Data Type filter and who meet the reporting population are included in the extract.
Select Grades	Select which grade levels to include on the report.
Calendars	At least one calendar must be selected when generating a PIMS extract. Calendars can be selected by the Active Year, by School or by Year. When a calendar is chosen in the Campus toolbar, that calendar is automatically selected.
Report Generation	To generate the report immediately, use the **Generate Extract** option. To choose when the report generates, use the **Submit to Batch** option. Submit to Batch is useful when generating the report for several calendars or for larger amounts of data being reported. See the Batch Queue article for more information.

		It appears that Census Poor is not a necessary eligibility choice when other qualifying conditions are already met. **Understanding**: If a student is identified as Census Poor and does not participate in any other benefit programs, and their income falls within the qualifying threshold, this status qualifies them for indirect certification. **Implementation Decision:** We will therefore use: **Certified Type = Income > Field 205 = 'C'** Census Poor will not be added as a separate option within the eligibility list, since its conditions are already covered under the Income-based indirect certification pathway. *Alphanumeric, 1 character*
