OLR Configuration List Editor

Last Modified on 08/21/2026 10:26 am CDT

This documentation applies to both versions of Online Registration.

Tool Search: OLR Configuration List Editor

The OLR Configuration List Editor is used to customize Configuration Groups, allowing you to limit the content that appears on certain lists in OLR.

See the OLR Configuration List Editor Tool Rights article for information on available tool rights.

OLR Configuration List Editor Descriptions

Field	Description

Field	Description
Eligible Enrollment Types	This tool **includes marked Enrollment Service Types** to be eligible to begin Online Registration from the Parent Portal. **Example:** If a district has three enrollment service types (Primary, Partial, and Special Education Services) and Primary is the only value selected in this list, **only** students with Primary Enrollments will be eligible to pull into Annual Update applications. Students who do not have a Primary enrollment in that Configuration Group's year will not pull into Annual Updates. Students with multiple enrollments only appear once. **Note:** Enrollment types vary by state and may be different than the ones listed above.
School List Exclude	This tool **excludes** chosen **School(s)** from being available in the School List dropdown list. **Example:** If a district has a school that parents should not be selecting while completing their OLR application, they can select that school in this list and that school will no longer be able to appear in the School List dropdown list under the **Student > Demographics** pleat in all types of OLR applications.
School Start Exclude	This tool **excludes** Enrollments from chosen **School(s)** from being considered for OLR eligibility for **Parents**. **Example:** If a district has an Adult Ed school and a parent is a student at that school, the Adult Ed school can be selected in this list to prevent those parents from pulling into an Annual Update application as a student.
School Pull Exclude	This tool will **exclude** chosen **School(s)** from being considered for OLR eligibility for **Students**. **Example:** If a district has a High School, Middle School, Elementary School, and an Alternate School, but they don't want the Alternate School students to be pulled into Annual Updates, the Alternate School can be selected in this list. Then, students who are solely enrolled at the Alternate School will not be pulled into an Annual Update application.
Medication List Exclude	This tool **excludes** chosen **Medication(s)** from being pulled into OLR from Campus. **Example:** If a district has a medication that is sensitive/private and shouldn't be pulled into an Annual Update for parents to verify that it is still current, they can select that medication in this list to prevent it from being pulled into an Annual Update application.

Field	Description
Health Condition Exclude	This tool **excludes** chosen **Health Condition(s)** from being pulled into OLR from Campus. **Example:** If a district has a health condition that is sensitive/private and shouldn't be pulled into an Annual Update for parents to verify that it is still current, they can select that health condition in this list to prevent it from being pulled into an Annual Update application.
Grade Level Exclude	This tool **excludes** students with enrollments in the chosen **grade level(s)** from being pulled into Annual Updates. **Example:** If a district doesn't want to have Pre-K students pulled into Annual Update applications, Pre-K can be selected in this list to exclude those students. Alternatively, some districts only want to have High School registration open at certain times, so the K-8 grade levels could be selected.

Edit a List

1. Select a list from the OLR Configuration List Editor.
2. Mark or unmark the desired checkbox in the **Exclude** column.
3. Click the **Save** button when finished.
