Feeder Imports Data Elements

When the Feeder Tools are purchased, this tool and the Feeder Exports are automatically be available for users. This tool can be used to review the imported data prior to creating an enrollment in the next school calendar. Because the Feeder Import does not create household information or relationships, the data populated here can be reviewed for accuracy and modified to fit into district format.

If additional fields are desired, users can add these fields by accessing the [Custom Attribute](#) tool in System Administration. This also means that the import file used would need to contain the added fields.

The following fields are available automatically.

Field	Definition	Field Location
Sending District	Name of district where student is currently enrolled.	Not available in Campus.
Sending School	Name of school where student is currently enrolled.	Not available in Campus.
Export Date	Date student data was exported, based on the file imported in the Feeder Import Wizard.	Not available in Campus.
Target School	Name of school student is expected to attend in the next school year.	Not available in Campus.
Family Enrolled	Selection indicates another member of that student's family is enrolled in the district.	Not available in Campus.
Parent First Name	First name of parent/guardian.	Census > People > Relationships
Parent Last Name	Last name of parent/guardian.	Census > People > Relationships
Parent Middle Name	Middle name of parent/guardian.	Census > People > Relationships
Home Phone	Home phone number of the household.	Census > Households > Household Info
Parent Email	Email address of the parent/guardian.	Census > People > Demographics > Personal Contact Information

Field	Definition	Field Location
Address 1	House number, street name, indication of apartment, direction information of the household.	Census > Households > Addresses
Address 2	Additional address information.	Census > Households > Addresses
City	Name of the city in which the household resides.	Census > Households > Addresses
State	State abbreviation in which the household resides.	Census > Households > Addresses
Zip Code	Zip code (plus 4) of the mailing address of the household.	Census > Households > Addresses
Student Number	District-assigned number associated with the student.	Census > People > Demographics > Person Identifiers
State ID	State-assigned number associated with the student.	Census > People > Demographics > Person Identifiers

The export date on Feeder Imports that indicates the date the students were extracted from the sending district. This field could be added to the [Ad hoc Filter](#) to find recently added students.
