Each module within Campus contains reports that can be generated by either a School or District (as noted) for gathering information such as average daily attendance, enrollment status, transcript summary and several other options.

Authorized users can generate reports without preventing another user from generating the same report simultaneously. This applies to authorized Portal users.

When a needed report cannot be found in the available reports, use the [Ad hoc Reporting](#) module to design reports using the [Filter Designer](#) and [Letter Builder](#).
