    - Behavior Reports Overview

Behavior Referrals

Staff members can be given access to submit behavior referrals electronically.

Behavior Referral Tool

This content explains how to use the Behavior Referral tool.

+ **Documentation**

+ **Video**

Behavior Management

Behavior Management tools are used to process staff-submitted behavior referrals.

Behavior Management Tool

Behavior Management tools are used to enter new behavior incidents, manage existing behavior information, and record information associated with new and existing behavior incidents and events.

+ **Documentation**

\+ **Video**

Add And Edit Behavior Events

Information can be added to new or existing behavior incidents that were submitted as a Behavior Referral or created in Behavior Management.

\+ **Documentation**

\+ **Video**

Add A Behavior Resolution

Behavior Resolutions are used to indicated actions that were taken regarding a behavior event.

\+ **Video**

Link Behavior Records And Attendance Records

Schools that choose to do so can link behavior and attendance, for example when a behavior resolution results in an out of school suspension that requires attendance entries.

\+ **Video**

Behavior Responses

Behavior Responses are used to record when a student's behavior event resulted in a staff member needing to administer restraint.

\+ **Video**

Detention Tracking

The Detention Tracker is used to record details regarding detention time assigned vs. time served.

\+ **Documentation**

\+ **Video**

Behavior Data (Individual Student)

Behavior data can be entered, maintained, reviewed and reported for individual students.

\+ **Video**

Behavior Reports

Behavior Reports allow the extraction of student behavior data including information related to

incidents, resolutions, removals and attendance.

Behavior Reports Overview

Description of the topic. *Example: Attendance for individual students can be entered and edited from this location.*
