Health: System Setup - Study Guide

Last Modified on 06/27/2023 11:00 am CDT

The Health Module is used to document student health information. This study guide demonstrates how to set up lists used to record and track vaccine exemptions and compliance, health conditions and treatments, medication types and forms, and information recorded during a health office visit.

> For an overview of all available videos related to Health administration set up, see the Health Administration Tools Video Series directory.

  - Referring Providers
- Medications
  - Medication Names
  - Medication Forms
- Health Office Visits
  - Complaint Types
  - Observation Types
  - Intervention Types
  - Discharge Types

Vaccination Tracking

Vaccine Exemptions

Districts may create a list of acceptable reasons for waiving immunization requirements.

+ **Documentation**

Compliance Labels

Compliance labels are used to indicate whether or not a student's immunization status is considered compliant.

+ **Documentation**

Conditions And Treatments

Health Conditions

Health conditions are conditions or diseases students may have that a school may be tracking. Health conditions can be linked to approved medications and treatment that are also being tracked in Campus.

+ **Documentation**

Treatments

Districts may maintain a coded list of treatments students receive for heath conditions.

+ **Documentation**

Referring Providers

Health Referring Providers are those individuals who provide medical services for the student. This tool is used to track and collect data for medical referring providers and those providers setup using this tool are used to populate provider information on a student's Health Conditions tool.

+ **Documentation**

Medications

Medication Names

Districts can create a list of medication names that appear for use in dropdown lists when staff record student health information.

+ **Documentation**

Medication Forms

Medication Forms are physical forms in which a medication can be administered.

+ **Documentation**

Health Office Visits

Several different types of information can be recorded when documenting student visits to the Health Office.

Complaint Types

Complaint Types are used to describe the reason a student has come into the health office.

+ **Documentation**

+ **Video**

Observation Types

Health observation types are used to note symptoms or other details observed in relation to a student's health complaint.

+ **Documentation**

+ **Video**

Intervention Types

Intervention types are used to indicate action taken to address a student's health complaint.

+ **Documentation**

+ **Video**

Discharge Types

Discharge Types describe where a student went when they left the Health Office.

+ **Documentation**
