

Health: Work With Student Health Information - Study Guide

Last Modified on 01/26/2023 3:21 pm CST

The Health Module may be used to document health information for an individual student. This study guide demonstrates how to:

- View general student contact and schedule information
- View and manage information regarding medical conditions and treatments
- View and enter immunization and screening information
- View and manage medication information
- Upload documents and maintain contact log
- Schedule, view and record health office visits
- Run student health reports

Student Contact And Schedule Information

Student Summary

The Student Summary displays basic demographic and contact information for the selected student.

+ [Documentation](#)

+ [Video](#)

Student Schedule

Use Student Schedule to see which class a student should be in at a given point in time.

+ [Documentation](#)

+ [Video](#)

General Student Health Information

Districts can choose to enter and track various health-related information for students.

Health Conditions and Treatments

Districts may choose to track health conditions students have, as well as treatments given to students in school for specific health conditions.

+ [Documentation](#)

+ [Video](#)

Immunizations

Districts can enter immunization information for students.

+ [Documentation](#)

Import Immunization Data

Districts can mass-import immunization information for students.

+ [Documentation](#)

Health Screenings

Districts can enter health screening results for students.

+ [Documentation](#)

+ [Video](#)

Batch Enter Health Screenings

Districts can batch enter health screening results for students.

+ [Documentation](#)

+ [Video](#)

Student Medication Information

Districts can enter information about medications being kept and dispensed for students.

+ [Documentation](#)

+ [Video](#)

Documentation: Use Contact Log

Districts may need to document information regarding contacts made on a student's behalf.

+ [Documentation](#)

+ [Video](#)

Schedule Health Office Visits

Students may be scheduled to come to the office to receive treatments or medications.

+ [Video](#)

Health Office Visits

Health Office Visits (Student)

Schools can track and report details regarding an individual student's visits to the health office.

+ [Documentation](#)

+ [Video](#)

Health Reports

See the Reports Section under Health Office in the Knowledge Owl outline for information on the various health reports that can be generated for students.
