

Release Pack Campus.2020 - May 2020

Last Modified on 11/09/2022 4:39 pm CST

Release notes provide the applicable personnel the ability to review enhancements, modifications and regulated changes prior to accepting an update. It is advised that users review the release notes carefully and alert appropriate district staff to changes in Campus.

The [Release Information](#) article lists the approximate release date of all 2020 Campus releases.

See the [Rx Pack - Campus.2020](#) article for a list of Rx releases to the Campus.2020 release pack.

Questions or concerns regarding an update should be directed to Campus Support.

Admin To-Do's

16 incomplete The classic Grading Window (Grading and Standards > Grading Window) will be removed with the Campus.2024 Release (June 2020). Review the Grading Window - .2024 release notification for details.

Infinite Campus is moving to update all servers to ICAS (Infinite Campus Application Service) 2.0.6, which incorporates Tomcat 8.5.50 and Java 1.8.0_232

Each ICAS release has a Campus version dependency and will require its own update before moving to a higher version of Infinite Campus. In order to update to Campus.2020, your production site must be on Campus.2016, which will include ICAS 2.0.6.

Cloud Choice and In-District hosted customers on Campus 2012.x or lower, you will not be able to submit an update request for Campus.2020, as it is hidden from the Version dropdown until Campus.2016 has been installed. There are code dependencies in each package that require them to be taken separately, so a district must first request an update to Campus.2016 before you can upgrade to Campus.2020. Your district will only see versions up to Campus.2016.x in the Update Request tool, and not other updates that may have been released, until Campus.2016 and the associated ICAS package have been taken.

Self-hosted customers will need to install the ICAS package before or after updating to Campus.2016.x. For more information on how to install the ICAS package, please see the instructions that have been posted to the Self-Hosted Customers forum.

Technical Information

See the [Technical Information - Release Pack Campus.2020](#) article for a list of schema changes in this release.

Academic Programs

Academic Planning – Planned alternate courses available in Ad hoc (SIS-115686) **[Enhancement]**

Alternate courses on a student’s Academic Plan can now be pulled into an Ad hoc report under Learner Planning > Course Plan. Alternate courses are found in the student’s Course Plan tab under ‘Alternates’.

Article(s): Course Plan (Academic Planning); Ad hoc Reporting

Path: Student Information > Academic Planning > Course Plan; Ad hoc Reporting > Filter Designer

Academic Programs - GPA Requirement detail verbiage (SIS-133851)

The 'GPA Requirement' detail verbiage on a student’s Academic Planning, Progress tab was displaying incorrectly for Academic Programs when the Academic Program was assigned prior to another graduation or academic program. The verbiage in the GPA Requirements detail has been corrected to read, “Minimum GPA required for completion” when viewing progress for Academic Programs.

Article(s): Progress (Academic Planning)

Path: Student Information > Academic Planning > Progress

Academic Programs- Progress tab error caused by invalid credit type (SIS-136203)

When a student has met the Academic Program’s credit requirement for a credit type, and earns additional credit, the Progress tab displayed an error if the Credit Overflow Override on the course had an invalid credit aligned. This has been corrected to follow the Credit Overflow Rollup logic identified in the Credit Group Detail editor in Grading and Standards.

Ad hoc Reporting

Ad hoc Reporting - Exporting Filters to Excel (SIS-136448)

When exporting filters to Excel, null values now report as blank, instead of \$nbsp.

Article(s): Filter Designer

Path: Ad hoc Reporting > Filter Designer

Assessments

Score Import Wizard - Error with Fixed Width Files (SIS-136840)

An error was returned when users attempted to import assessment scores using the Fixed Width File Format. This has been corrected.

Path: Assessment > Score Import Wizard

Attendance

COVID-19 Attendance and Calendar Modifications (SIS-136720) [Enhancement]

To further assist districts in recording attendance for distance learning, modifications that convert assignment data into actual attendance data have been made:

- Attendance Codes - A new checkbox was added, called **Allow assignment-based attendance modification**. When marked on an Attendance Code, the code is made available for selection in Enable Attendance Posting on the Calendar. It is recommended that a new attendance code be created for this purpose, rather than adding the checkbox to a previously created code.
- Calendar Details - New attributes added in another update for distance learning have been reorganized into a **COVID-19 Assignment-Based Attendance** section. The following fields are available:
 - **Enable Attendance Assignment Insert** (previously named **COVID-19 Attendance Teacher Only**). This indicates that a COVID-19 assignment should be created in every section of an attendance-taking course on an attendance day that it is scheduled in an instructional period. When the related Task runs, assignments are created. Subsequent fields are dependent on this field being checked.
 - **Enable Student Assessment** (previously named **COVID-19 Attendance by Student**). This indicates that a quick assessment linked to the assignment created above will be created for students to enter attendance in Campus Student. When the related Task runs, assessments are created. Campus Learning must be enabled for this to happen.
 - **Enable Attendance Posting**. This indicates that attendance will be posted to the attendance table based on scores and flags in the COVID-19 assignments when the related Task runs.
 - **Attendance Posting Date**. This indicates the earliest date for which attendance will be posted to the attendance table. Every time the Task runs, attendance from the Start Date forward will be reviewed and updated based on scores and flags in the COVID-19 assignments.
 - **Attendance Posting Code**. This indicates the Attendance Code that will be posted on

the date/period when a COVID-19 assignment has scores or flags that indicate non-participation/absence. The list of codes is populated with the Attendance Codes that are checked marked for **Allow assignment-based attendance modification** as described above.

See SIS-136511 for other COVID-19 related updates. See the articles below for guidance on using these features to record attendance.

COVID-19 Attendance Update (SIS-137063) [Enhancement]

The COVID-19: Enable Attendance Assignments task has been updated to assign a Category Sequence of 99 to the Attendance Assignment that process creates in the Grade Book. Any existing Attendance Assignment categories have also been updated with this sequence.

This change limits the accidental use of that category by teachers when creating new assignments for their students.

Section Summary Report (SIS-136620)

Previously, some users experienced an abnormal termination error when generating the Section Summary report. This has been corrected for most districts and an additional case is being worked on to address this issue in districts where it is still occurring. If your district is experiencing this error after taking the Campus.2020 release, please submit a new Support case and Campus Support will link it to the outstanding issue.

This error occurs when generating the report in PDF format; Campus recommends using the .DOCX format as a workaround until this issue is fully addressed.

Ed-Fi

Ed-Fi - Error Log Updates (SIS-134369) [Enhancement]

A new user interface has been implemented to improve usability of the Ed-Fi Error Log. Users are now able to view errors by Summary by Resource/Table, Error Type & Resource, Person, School, Configuration, and Details. Users can also filter Error Log entries by Resource/Table Name, Error Type, Configuration, School, Calendar, Course, and Name.

The Error Log Retry and Archive options have been updated to take action only on filtered results.

The Ed-Fi Error Log extract report has also been updated to return results based on filtered options.

Schedule Wizard - Conflict Matrix (SIS-135091) [Enhancement]

The Schedule Builder has a new request conflict matrix interface built into the manual builder. By dragging a course onto the schedule grid, the builder algorithm ranks the three best placements for the new section based off the period slots with the fewest conflicts without sections and courses. Those best placements are highlighted, letting the user know the best place to schedule the section. The first ranked position is the same location the Auto-Build logic would choose if a single section were placed.

LDAP Authenticated Accounts Incorrectly Receiving Password Reset Emails (SIS-132882)

LDAP authenticated Campus accounts were incorrectly receiving a Forgot Your Password email notification when users selected this option on the Campus login screen. This email is an error because LDAP authenticated passwords are not reset or maintained by Campus but by your district's Active Directory. This email notification was also then resetting the user's local Campus authentication password. This issue has been corrected. Now, LDAP authenticated accounts will no longer send a Forgot Your Password email notification to users nor will it reset their local Campus authentication password.

Device-Based Two-Factor Authentication Add to Infinite Campus (SIS-136186) [Enhancement]

As an increased layer of protection for your Infinite Campus account, device-based two-factor authentication functionality has been added. Districts can now enable this functionality for all Staff and non-Campus Portal accounts via the Login Security Settings tool or for individual staff accounts via the User Account tab. Staff members themselves can also enable this functionality via the Account Settings tool.

When enabled, users will be provided with a time-based QR code and Text Code which requires the user authenticate their account using a device and an Authenticator application (such as Google Authenticator, Authy, LastPass, etc) where you must scan the QR code or enter the Text Code provided in order to finish logging into Campus.
