

BIE Course Data

Last Modified on 05/29/2026 10:00 am CDT

Tool Search: Course Information

The BIE Course Data section of the Course Editor is used to identify BIE-funded and approved courses. Fields within this section are used for state and federal reporting and are therefore only reporting indicators. Additional course or program setup may be needed as determined by the school, district, or state. Fields within the BIE Course Data section sync to NASIS.

If your district uses Course Masters, the same fields appear in the Course Master editor and the Course editor.
