

LTI - Resource Selection

Last Modified on 09/07/2023 3:49 pm CDT

This article is intended for use by members of the Digital Learning Partner Program and is not designed for general Campus users.

- [Overview](#)
- [Launch Parameters](#)
 - [Launch Parameters - Deep Linking via Content Extension](#)
 - [Launch Parameters - Deep Linking via Content Item](#)

Overview

Campus also uses LTI resource selection flows to allow a teacher to launch a learning tool, select a resource, and attach the resource within the context of an assignment or learning activity. Currently, Campus can ingest either LTI Links or HTML Content.

To support resource selection, Campus has implemented both the [Content Extension](#) courtesy of EduAppCenter and [Deep Linking](#) courtesy of IMS Global. When Campus builds the integration with your product, Campus will configure which implementation type you prefer to use.

Launch Parameters

These are present in all resource selection launches

Parameter Name	Description	Value or Example
context_type	Only one context type available in Campus Learning.	<i>CourseSection</i>
context_title	Course/Section Name + School/Calendar Name	<i>Reading-7 19-20 Fillmore Middle School</i>
context_id	Section identifier	<i>320152</i>
context_label	Course Number + Section Number	<i>6000-7</i>
resource_link_title	Name of the assignment / LearningObject	<i>Analysis of Patterns</i>
lis_course_section_sourcedid	Section identifier	<i>320152</i>

Launch Parameters - Deep Linking via Content Extension

Parameter Name	Description	Value
ext_content_return_types	We currently only support content extension returning LTI links. Hard-coded	<i>lti_launch_url</i>
ext_content_intended_use	Hard-coded	<i>navigation</i>
ext_content_return_url	URL to which you should return the selected LTI link.	<i>https://state.infinitecampus.com/campus/resources/curriculum/lti/selectReturn</i>

Launch Parameters - Deep Linking via Content Item

Parameter Name	Description	Value
accept_media_types	We currently only support LTI Links or HTML. Hard-coded	<i>application/vnd.ims.lti.v1.ltilink,text/html</i>
accept_presentation_document_targets	Hard-coded	<i>iframe</i>
content_item_return_url	URL to which you should return the selected content item(s).	<i>https://state.infinitecampus.com/campus/resources/curriculum/lti/selectReturn/cor</i>
lti_message_type	Hard-coded to new value, per the specification	<i>ContentItemSelectionRequest</i>
accept_multiple	We currently only support one. Hard-coded to false	<i>false</i>
accept_unsigned	Hard-coded to false	<i>false</i>
auto_create	Hard-coded to true	<i>true</i>
