

# Daily Health Log Scanning

Last Modified on 12/14/2025 8:45 pm CST

The Scanning toolset is part of the [Campus Workflow Suite](#).

Tool Search: Daily Health Log Scanning

The Daily Health Log Scanning tool is used to scan in students for daily health tracking purposes in conjunction with the Daily Health Log tool. Enter a student number or scan in an ID and click **Enter**.

The screenshot shows a web interface titled "Daily Health Log". Below the title is a light gray header bar. Underneath, there is a white box containing the text "Please scan your student ID \*" in red. Below this text is a long, empty white input field. At the bottom left of the white box is a blue button with the word "Enter" in white text.

Once a student scans in, the Daily Health Log displays.

## Add a Daily Health Log Record

See the [Daily Health Log](#) documentation for information on how to enter Daily Health Log records.
