Technical Information

See the Technical Information - Release Pack Campus.2048 (https://kb.infinitecampus.com/help/technical-information-release-pack-campus2048) article for a list of schema changes in this release.

Activity Registration

Activity Registration Updates (SIS-141422) **[Enhancement]**

The following changes were made for Activity Registration.

- Activity Registration now supports interactive custom forms. Interactive forms allow users to enter data directly into the PDF and electronically sign when registering for an activity. A request for data and/or signature can be sent to the student and/or parent/guardian(s) on the Campus Parent and/or Campus Student portal. Campus Student and Campus Parent portal will notify the user if there are required forms that must be completed or before the activity is added to the School Store cart. If you use an interactive form, you can also use the following Ad hoc fields to prepopulate the form: "activityName" and "studentFirstLastName"
- ." For more information about creating interactive forms, see the Custom Forms article on the Infinite Campus Knowledge Base.
- The Activity Roster was updated to allow viewing the forms associated with each student. Districts can see eSignatures and enter a contact log. A Lock/Unlock button is also available on the form. A locked form indicates no additional changes can be made. While district staff cannot sign for students/parents, the eSignature can be overridden.
- When you manually add a student to the roster, all forms must be reviewed and if applicable sent for eSignature. Forms can then be filled out in the Campus Student and/or Campus Parent Portal in the Documents tool. District staff can also fill out forms (except for the eSignature) in the Activity Roster if necessary.
- The "School(s)" field on step 1 of the Activity Builder is now unlocked and can be modified until the Activity's status is Registration Closed.

Ad Hoc Reporting

Ad Hoc Error for Daily Health Log (SIS-141909)

An error was occurring when using custom attributes/fields in Ad Hoc for the Daily Health Log tool. This issue has been corrected.

Blended Learning

Blended Learning - Virtual Attendance Posting (SIS-141584)

When the Virtual Attendance posting job runs, attendance records are no longer written for a date that is before the student's Enrollment Start Date, even when the student is scheduled into a course section before that start date.

The Attendance Posting code always overwrites attendance records with different codes that are marked for virtual attendance as long as the record is on a date that is greater than or equal to the Attendance Posting Date and the virtual student does not have Participation Confirmation in the course section.

Blended Learning - Overlapping Enrollments Reporting Multiple results in Filter Designer (SIS-141782)

When a student has multiple non-overlapping enrollments to the same calendar, the virtualToday and virtualTomorrow results reported two lines. This has been corrected to report a single line per student per calendar, regardless of the number of enrollments in that calendar a student may have.

Path: Ad hoc Reporting > Filter Designer, Data Viewer

Blended Learning Updates (SIS-141785) **[Enhancement]**

The following modifications have been made to Blended Learning tools:

- To provide a cleaner interface for New Blended Learning Groups, a new side panel has been added where learning groups can be edited. This includes modifying the name of the group, updating the group color, adding an end date for the group, and marking the group as active or archived.
- Blended Learning Group Assignments can now be assigned to calendar days in the past. The selected group must be active in order to be assigned. Group Day assignments can be added but not removed.
- Users can now hide archived groups from the main view of New Blended Learning Groups, Adjust Blended Learning Groups and Manage Blended Learning Groups.
- A group can only be backdated to the earliest attendance date. When the Group Start Date is already equal to the earliest attendance date, an error message displays.

- When creating new automatic groups, a new message displays if a gap is detected in the group assignments. Group day rotations will need to be manually adjusted.
- Updated alert messages have been added to provide clarity when database connection has been lost during the group creation process.
- Removing a Group End Date now also removes the end date on the Student Group Assignment.
- When adjusting the student group assignment, changing the selected group now updates the list of students in that group.

Blended Learning - Updates to Blended Learning Groups Incorrectly Updating Future Assignment End Dates (SIS-142047)

When a student has a future Blended Learning Group assignment and an update is made to current or past assignments, choosing to keep the future assignment caused it to be ended. This has been corrected. Choosing to keep the future assignment does not modify the end date.

Blended Learning - Group End Date Updates All Student Assignments to that Group (SIS-142139)

When a Blended Learning Group that automatically assigned students to it was end dated and new groups were created with a future start date, all students in that group were automatically end dates, even when they already had an end date. This has been corrected.

Blended Learning - Student Assignment Not Inheriting Existing End Date on Blended Learning Group (SIS-142147)

When a student was assigned to a Blended Learning Group that has an end date in the future, the student assignment did not inherit the group end date. This has been corrected.

Also note that a student's Group Assignment end date cannot be after the group end date.

Blended Learning - Ad hoc Participation Detail View (SIS-142194)

In the Campus.2044 Release (see SIS-141293 (https://kb.infinitecampus.com/help/release-pack-campus2044-october-2020#blended-learning---participation-detail-view-sis-141293)), spaces were removed from column names in the Blended Learning Participation Detail View to maintain consistency with other database views. This caused errors for users who had saved filters using the column names with spaces.

To correct this, the original column names with spaces have been re-added but are deactivated. Use the Element Replacement tool in Data Utilities to update the saved filters with the spaced column names to instead use the non-spaced column names.

Article(s): Element Replacement

Path: System Administration > Data Utilities > Element Replacement

Blended Learning - Ad hoc Student Participation Check In Timestamp (SIS-142224)

An update to remove spaces in the Participation Detail View caused the Check In Timestamp field to report information from the incorrect database column. This has been corrected.

Blended Learning - Backdating of Blended Learning Groups (SIS-142435)

Performance issues have been discovered when larger districts are backdating many calendars over longer periods of time. To avoid these issues, backdating is currently being limited to one week at a time while a permanent solution is constructed. Internal error tracking measures have been added to assist in addressing the issue.

Blended Learning - Virtual Attendance Posting Job Performance (SIS-142471)

The performance of the Virtual Attendance Posting Job has been modified to run for one posting job at a time. This prevents a site with many calendars/many days from being brought down when the posting time is the same for all calendars.

Districts with many calendars running the posting job at the same time should set the posting job time 15-30 minutes earlier than the default time, 11:59 PM, to avoid posting attendance for the current day if the job is triggered after midnight.

Blended Learning - Walk-In Scheduler Group Counts (SIS-142657) **[Enhancement]**

The total count of students in a Blended Learning Group now displays when hovering over active grid sections in Walk-in Scheduler. The hover shows the Room Number, total number of students with an IEP, and the Blended Learning Groups with a count of students in each group.

Article(s): Walk-In Scheduler

Ed-Fi

New Ed-Fi Data Tool and Ed-Fi Updates (SIS-135709) **[Enhancement]**

The Ed-Fi Data tool has been made available to allow districts to compare student related Ed-Fi resources with the data that is in Infinite Campus. An Ed-Fi JSON for the selected resource can also be viewed from this tool.

The following Ed-Fi updates have also been made:

- The Resync tool has been updated to make the All People checkbox and Person ID field not required when resyncing non-person related resources. The Resync tool has also been updated to not select optional resources when the Select Dependencies checkbox is checked. The Select Dependencies checkbox will not be checked by default.
- A Grades records error that was occurring due to the incorrect beginDate pulling in the Student Section Association Reference has been fixed.
- The trigger logic for the Grading Periods resource has been updated to delete the resource when the last remaining day in the day table is deleted for a school.
- The totalInstructionalDays element in the Grading Periods resource has also been updated to report when the instructional day checkbox is checked or unchecked. If all days are marked as non-instructional, the element will report ‘0’. The totalInstructionalDays element has also been updated to report the distinct number of instructional days from all calendars/schedule structures that have a specific grading period (same school, descriptor, and sequence) when there are multiple calendars and/or schedule structures.
- The resync logic for the Grading Periods resource has been updated to not send the resource when there are no days in a calendar.
- The removal of a mapped entry over an empty entry in the Resource Preferences has been fixed.
- The resync queries have been updated to check configuration dates rather than hard-coded dates.
- A bug that was occurring in the Economic Disadvantaged characteristic in the Student Education Organization resource has been fixed.
- An error that was occurring in the Parents resource and multiple keys has been fixed.
- The Calendar Delete tool has been updated so that no errors appear in the Error Log when the tool is run on a calendar that exists in Swagger. An update has also been made so that the Calendar resource is deleted when a calendar is deleted from Infinite Campus.
- The Ed-Fi Error Log has been updated to log errors from the Delete Tool with invalid

EdFiIdentityIDs.
- An Import Certificate button has been added to the Connection Detail page to import a certificate from the ODS based on the API URL.
- A School filter and All Schools checkbox has been added to the Ed-Fi Identity Mapping tool to allow districts to filter results by school.

Third-Party Password Breach Notification Added (SIS-128549) **[Enhancement]**

Infinite Campus has been updated to read and utilize a global database used to track passwords and accounts affected by data breaches of non-Infinite Campus systems. A new 'Prohibit Passwords That Have Been Previously Disclosed in a Data Breach' preference has been added to the Account Security Preferences tool. When enabled, if Infinite Campus detects a user's password matches a password found in a publicly known data breach, it will automatically notify the user and recommend they update it.

This feature is optional and not automatically turned on or mandated by Infinite Campus.

NOTE: Notification of a breached password DOES NOT mean your Infinite Campus account has been breached. It means your password matches a password found in a global database of breached passwords from third-party systems who have had a data breach.

Massachusetts – Virtual Day Attendance Override Added (SIS-141936)

A Virtual Day Event Override was added to Day > Type attribute. This field helps in attendance reporting for calendars where blended learning groups were not set up completely correct at the beginning of the school year. This option allows districts to count a calendar day as virtual for the district even if blended learning groups were not set up.

To properly report attendance for Virtual Day Override Events on calendars, the following SIF logic was modified:

- StudentAttendanceSummary/DaysAttended
  - In Person is defined as a student who does not have a Blended Learning Group assigned to them or is in a Blended Learning Group that is not assigned to a Day Event on the Calendar or there is NOT a Virtual Day Override Event on the calendar.
- StudentAttendanceSummary/ExcusedAbsences
  - In Person is defined as a student who does not have a Blended Learning Group assigned to them or is in a Blended Learning Group that is not assigned to a Day Event on the Calendar or there is NOT a Virtual Day Override Event on the calendar.

Massachusetts – FTE Override Fields Added to District Assignment (SIS-142235)

The October 1 FTE Override and EOY FTE Override fields have been added to the Employment Assignment Information section of a District Assignment record.

To account for these new fields, logic for the SIF StaffAssignment/JobFTE element has been updated to the following:

- Report the value of the FTE of Assignment for the staff. (When a district assignment does not have an associated course section that extends on or past the current date, do not include this district assignment.)
  - Report October 1 FTE Override value if this field is populated and the reporting date is 10/01.
  - Report EOY FTE Override if this field is populated and the reporting date is in the month of June.
- When the staff does NOT have a district assignment with a Start Date <= the current date, and the district assignment(s) do not have an active course as of the current date, report 0.00.
- The value reported cannot exceed 1.00.
- When the District Employment FTE of Assignment field = Null, assume 0.0 in this field.
- When multiple District Assignment records exist with the same Title standard code (JobFunction/OtherCodeList/OtherCode) for a staff member per school per school year, sum the FTE values of the active assignments.

Massachusetts – SIMS and SIF Updated to Properly Report Student End Status (SIS-142290)

The SIMS Report and SIF logic have been updated to properly report a student's end status when the end date on their enrollment matches the report effective date.

Updated logic is as follows:

- SIMS Report – enrollmentStatus
  - Report Enrollment Status if Enrollment Status has a valid value AND extract Effective Date > or = to enrollment End Date.
  - If End Date is after the Effective Date AND Enrollment Status has a valid value other than 40 or 41, report 01.
- SIF – StudentSchoolEnrollment/ExitTypeCode
  - If Local Enrollment Status = "40 Not Enrolled: Receiving SPED Services only", or if the state reporting date is on or after the enrollment end date and there is no end status, report the standard code associated with the state value mapped to the local end status.
- SIF – StudentSchoolEnrollment/ ExitType/OtherCodeList/OtherCode
  - If state reporting date is on or after the enrollment end date and the enrollment end status is not null, then report 2 digit end status code.

Massachusetts – SIF StaffAssignment to Send Non-Teacher Record to State (SIS-142578)

Population and business rules for the SIF StaffAssignment object have been updated to include the following:

- The following requirements only apply to assignments where the title codes only have a value attribute of "t"
- The staff must be assigned to the section as a Primary Teacher OR a Teacher
- Note: If all assigned sections have no students with primary enrollments rostered into the course, staff assignment will not pull (in other words, at least 1 student with a primary enrollment must be enrolled in at least one course section the teacher is assigned to).

Also, the following Non-Teaching Staff Assignment Codes were updated with a "t" in the Value column to identify those non-teaching staff codes that should report to the State. These Staff Assignment Codes can be found under System Administration > Custom > Attribute Dictionary > EmploymentAssignment > Title > Dictionary. "T" values can be updated by the district at any time as needed.

Value = t for the following Staff Assignment Codes/Titles:

- 2305 - Teacher
- 2306 - Co-Teacher
- 2307 - Virtual Course Teacher
- 2308 - Virtual Course Co-Teacher
- 2310 - Teacher - support content instruction

Missouri

Missouri - MOSIS Student Graduate Follow-Up, Student Core (SIS-136113)

The following fields on the MOSIS Student Graduate Follow-Up Extract have been modified for new reporting logic.

- CIP Code (field 145) reports from the CIP Code field on Student Graduation tool when the Career Ed field on the State Reporting Enrollment editor has a value of CNP or CHS. When the CIP Code is blank, the CTE Program Type field on the course is matched to the CTE Program Type selection on the Enrollment record.
- CTE Program Code (field 150) reports from the CTE Program Type field on the State Reporting Enrollment editor.
- Perkins Concentrator (field 95) reports a value of Y when the CIP Code (field 145) is populated and the Career Ed field is either CNP or CHS and the CTE Program field is populated.
- The following fields report a value of Y when marked on the enrollment record and when CTE Program Type (field 150) ends in a value of 10.
    - Nontraditional Student (field 110)
    - Single Parent (field 115)
    - Displaced Homemaker (field 120)
    - Other Barriers (field 125)
- Follow Up Zip (field 155) now reports blank for all records.

On the MOSIS Student Core Extract, Nontraditional Student (field 292) now reports as follows:

- When the NonTraditional Student field is set to Yes, a value of Y reports.
- When the NonTraditional Student field is set to No, the CTE Program Type is used.
    - When that is set to 0104, 0804 or 1004, and the student's gender is Y, a value of Y reports.
    - When that is set to 0504, 0604 or 0704, and the student's gender is M, a value of Y reports.
