Technical Information

See the Technical Information - Release Pack Campus.2052 (https://kb.infinitecampus.com/help/technical-information-release-pack-campus2052) article for a list of schema changes in this release.

Academic Planning

Academic Planning– Prerequisite or Concurrent Planning Rule not considering credits earned (SIS-137815)

An issue was identified with Academic Plans not respecting the Prerequisite and the Prerequisite or Concurrent Planning Rules in the Course Planner for courses to which the rules applied. If a student had taken but failed a prerequisite course and did not receive credit, the Planner looked for the presence of the course but dismissed the credit requirement needed to satisfy the rule. This allowed students to add courses to their plan even if they failed to meet the prerequisite requirements. This has been fixed.

Activity Registration

Activity Registration Ad Hoc Data for Custom Forms (SIS-142794)

Ad hoc reporting is now available for Custom Forms used for Activity Registration. Users can now create custom queries and reports from data found on the forms and data that is entered on the form by users. Use the Filter Data Type of Student to locate filter fields in the following categories: Custom Forms: activity, Custom Forms: athletics, and Custom Forms: fieldTrip.

Activity Registration Updates (SIS-142884) **[Enhancement]**

The following changes were made for Activity Registration.

- Changes were made to allow an activity to be purchased in Campus Parent when the student has multiple guardians and the forms have been manually updated in the Activity Roster.
- The Post to Course section process was not displaying the correct school calendar when more than one school was on the activity. This issue was corrected.
- The Ad hoc Filter Designer was updated to prevent users from deleting an Ad hoc filter if it is associated with a School Store Product or an Activity.
- The selection (on or off) for the Registration Confirmation Process toggle is now retained when users exit and return to the screen.

Blended Learning

Blended Learning - Ad hoc Reporting Course/Section Data Type Fields Total Count of Students (SIS-141955)

The Blended Learning Summary and Blended Learning Summary (Overall) Ad hoc fields return one row per Blended Learning Group and include summary counts of students' current Blended Learning Group assignments, if the section is currently active.

For sections meeting in previous terms, the last day of the section is used as the effective date (last day of the last term in which the section meets), and returns one row per Blended Learning Group and includes summary counts of students' Blended Learning Group assignments as of the last day of the section.

For sections meetings in future terms, the first day of the section is used as the effective date (first day of the first term in which the section meets), and and returns one row per Blended Learning Group and includes summary counts of students' Blended Learning Group assignments as of the first day of the section.

Previously, student enrollments started after the first day of the first term in which a section met were not being included in the Blended Learning Summary counts. This has been corrected.

Blended Learning - Update to Virtual Attendance Posting Job (SIS-142931)

The Virtual Attendance Posting Job now includes the ability to compare the date was scheduled to run with the date the job was triggered. Virtual Attendance records are not posted for a day that is after the day the job is scheduled, even if the job is scheduled close to midnight and triggers after midnight. This eliminates the need to set the virtual attendance posting job time back.

Ed-Fi

Ed-Fi Data Tool Updates (SIS-141419) **[Enhancement]**

The following updates have been made to the Ed-Fi Data tool:

- The Ed-Fi Data tool will display any errors that are active in the Error Log for the selected student.
- A resync can be performed from the Ed-Fi Data tool.
    - Please note that a resync from the Ed-Fi Data tool will not include any dependencies.
- When a resync is performed, all errors for the selected student that are in the Error Log for the selected resources will auto-archive.
- A Unique Identifier for both Ed-Fi and Infinite Campus information has been added for every resource.
- A Campus Identifier has been added for Infinite Campus information for every resource.

The Delete button has been added to the Ed-Fi Certificate tool.

Messenger

Messenger– Mailgun Message Log not displaying a specific failed message status correctly (SIS-137445)

This fix only applies to districts using Mailgun API. An issue has been resolved that was causing the Mailgun Message Log to incorrectly display a failed message status as "Accepted" when the error reason was too long to display in the log. Messages will now correctly display a “Failed” status with a reason provided.

Messenger (Email)– Mailgun Message Log displays a warning when record pull-count exceeds 4000 (SIS-140973)

This fix only applies to districts using the Mailgun API.

When viewing the Mailgun Message Log, a warning message triggered if the number of requested records exceeded 4000. This message urged users to adjust date parameters (further narrowing the returned results) and warned only the first 4000 records would display; however, this limit was not enforced. The warning message has been removed.

Multi-Day Serve (SIS-140055) **[Enhancement]**

To support school's COVID-19 food distribution needs, a new feature called "Multi-Day Serve" was added to the Campus Point of Sale. Multi-Day Serve allows schools to hand out meals for multiple days using a single transaction on the point of sale. This eliminates the need for manually entering daily meals. Eligibility rules are still followed and meals can still be verified using the Edit Check report. Students are charged for the meals on the day the meal was meant to be served to them, not necessarily on the day they received the meal. Multi-Day Serve can be run with the terminal offline or online.

To use this new feature, cashiers can select "Multi-Day Serve" on the Menu Control screen. The Multi-Day Serve screen allows cashiers to search for the patron, select the purchasable items, and select the days on which the meals should be processed.

Tally Meal Entry Edit Check Report (SIS-140075)

The Tally Meal Entry version of the Edit Check report is now available for CEP schools or schools that record meals in bulk using the Tally Meal Entry tool. The Tally Meal Entry tool must be used in order to generate this report. This version of the report prints school level summaries of enrollment and total meal counts grouped by the purchasable items' Federal Program.

Clarification Added to Time-Based Two-Factor Authentication and Option to Skip Added (SIS-142957)

A note has been added to Account Settings to indicate when a user has enabled time-based two-factor authentication for their account. This note also includes suggestions on what authenticator applications they can use and where to find them.

For users whose district has not enabled time-based two-factor authentication but have enabled it for themselves, login logic has been updated to allow the user to disable the time-based two-factor authentication requirement by selecting a new 'Disable time based two factor authentication'

button. This button should be used by users who have enabled time-based two-factor authentication but are unable to figure out the process or have changed their minds and no longer wish to use it.

> Once a user has successfully logged into their Infinite Campus account at least once using time-based two-factor authentication, they can no longer access or select the 'Disable time based two factor authentication' button. These users must first log into Infinite Campus and disable time-based two factor authentication via their Account Settings tool.

Massachusetts – HR License Numbers and MA Degree Info Missing from SIF Data (SIS-142759)

HR License Numbers and MADegreeInfo extended element info were pulling data from incorrect data tables and reporting null values via SIF. To correct this issue the following updates were made:

- For the SIF StaffPersonal object, the following trigger logic was added:
    - A Change event occurs when any changes are made to a staff's License Number
    - A Change event occurs when any changes are made to a staff member's MADegreeInfo element.

- Logic for the StaffPersonal/OtherIdList/OtherId element has been updated to the following:
  - When the License is Active as of the State Reporting Date (or today's date if the State Reporting Date is Null) and the License Number is Null, element (OtherIDList) does not report.
  - When multiple licenses exist for the same Employment record, then report the License that is Active as of the State Reporting Date (or today's date if the State Reporting Date is Null) and use the Active License that contains the latest Start Date.
  - If any of the 3 fields of Degree Type, Degree Institution, or Degree subject are Null, then report all Null values for all fields.
  - If any of the 3 fields of Degree Type, Degree Institution, or Degree subject contain 00 values, then report those 00 values in addition to any field that may contain numeric values.
  - The data table location has been updated to now pull from Human Resources > Personnel > Personnel Master > Qualifications > Education > Qualifications Details.

Utah – December 1 Reporting Updates (SIS-141976)

The following SIF-related updates were made to ensure proper Dec 1 reporting:

- Logic for the StudentAcademicRecord/AcademicPerformanceSummary/ProjectedGraduationDate element has been updated to report the year in NGA Cohort End Year, followed by the month in which the student's latest year calendar ends, prioritized by latest Start Date, then Primary enrollment.
- Logic for the StudentParticipation/ExtendedElement/TimeCode element has been updated to report null when the Time field is Null or N/A.
- Logic for the StudentParticipation/StudentSpecialEducationFTE element has been updated to report null when the Regular Percent field is null or N/A.
- Logic for the StudentParticipation/ExtendedElement/IsOnePercent element has been updated to the following:
  - In the SPED StudentParticipation (0270) instance:
    - Reports "Y" when DLM 1% field = Yes.
    - Otherwise, reports blank.
- Logic for the StudentAcademicRecord/ExtendedElement/PercentileRank element has been updated to have a maximum allowed value of 99.99.
- Logic for the DisciplineIncident object has been updated to the following:
  - For a Primary Event - When there is only 1 Behavior Event on the Behavior Incident:
    - When Primary Event = Checked.
    - Otherwise, report "Primary" for the lowest Event ID when no Primary Event exists.
  - When there is more than 1 Behavior Event on the Behavior Incident, and the student does not belong to a Behavior Event with "Primary Event" = Checked, report "Primary"
- Logic for the StudentSchoolEnrollment object has been updated to include the following:
  - When a student has > 1 enrollment that belongs to the same School, where the enrollment Start Date and End Dates (or null End Date) overlap, and the Service Type of the overlapping enrollment(s) is NOT Primary, only 1 StudentSchoolEnrollment record must be reported, which will be from the Primary enrollment.
  - Note: When an enrollment End Date is entered, we report End Date +1, which means that if the subsequent enrollment begins on the End Date +1, the prior End Dated enrollment will overlap the subsequent enrollment, and so this would be considered an overlapping enrollment.

The Title 1 Start Date and Title 1 End Date fields have been reactivated on the Title 1 program.

The Special Ed Time, Regular Percent, and DLM 1% fields have been added to Ad hoc:
