Activity Registration

Activity Proposals and New Activity Dashboard Tool (SIS-145014) **[Enhancement]**

A new tool called "Activity Dashboard" is now available. This tool allows primary and secondary activity owners to manage their activities. Activity owners can see previous, current, upcoming and proposed activities. The proposed activities feature is also new with this release. The Activity Dashboard allows users with the appropriate tool rights to propose new activities.

When an activity is proposed, it appears in the Activity Monitor under the "Proposed" filter. Users with read rights to the new Activity Registration > Activity Monitor > Activity Approval tool right can view proposed activities and approve, decline, or return (for changes) the activity to the user who proposed the activity.

Notifications appear for the appropriate users when a proposed activity is submitted and when a proposed activity has been reviewed. (Notification links for proposed activities are currently unavailable in the new look and feel of Campus.)

Transcripts - Course Entry (SIS-143098)

When adding a new course to a student's Transcript, the list of available courses now returns from all of the following:

- Course/Section from the school where the student was previously enrolled (School Number on the Transcript record).
- Course/Section from the school selected in the Campus toolbar in which the student is currently enrolled.
- Course Master used at the district.

If a Course Number and Name is identical in any of the three catalogs mentioned above, the list only shows one result that is the course at the Course/Section level for the school where the student was previously enrolled (School Number on the Transcript record).

The list of courses returned also depends on the school year selected for the Transcript record. If there is no school year selected, the school year selected in the Campus toolbar is used.

Appropriate fields are auto-populated, including SCED and Online Learning fields, when adding a new record either from the Detail screen or the Main screen. GPA Weight, Credits Attempted, Credit Type, Terms Long and Credit Overflow Override are also updated as Course Numbers are entered. Editing an existing record does not change those values automatically.
