Technical Information

See the Technical Information - Release Pack Campus.2120 (https://kb.infinitecampus.com/help/technical-information-release-pack-campus2120) article for a list of schema changes in this release.

Activity Registration

Activity Registration Updates (SIS-145910) **[Enhancement]**

The following changes were made for Activity Registration.

- When a Primary Owner is not the person who created the activity changes the Primary Owner to another person, Campus now displays a message explaining that they will not have access to the activity after they save their changes.
- When a Primary Owner is not the person who created the activity and changes themselves as the Activity Owner (Secondary), Campus now displays a message explaining that they will have only have read-only access to the activity after they save their changes.

- The Campus Portal now finds the student's current enrollment record and checks that school's portal preference to determine whether Activity Registration section should display. If there isn't a current enrollment record, Campus will use a previous enrollment record to determine if the Activity Registration section can display.
- If a user opens an activity in the Activity Dashboard that is "View" only, the button on bottom is now Close and not Cancel.
- Users can now select multiple people in the Primary Owner field.
- A "Created by:" field with the name of the person who submitted the activity for proposal or created the activity to was added to Step 1 on the Proposed Activity/Activity Builder.
- Approvers can now skip to the final step in the review process and are not required to enter a Category or Product Type when returning or declining an proposed activity. However, Category and Product Type are still required to approve a proposed activity.
- Users submitting a proposed activity can now skip to the final step in the process when a proposed activity has been returned.
- Users cannot approve their own proposed activity.
- The title of the Recall window was changed from "Removal Details" to "Recall Details".
- When the "Additional Forms Pending" checkbox is marked, the "Approved" option on the final step is disabled.
- A message was added to the end of the Proposal Workflow to notify users that they cannot approve an activity because required fields are missing or additional forms are pending.
- If a user does not have Delete rights to the Activity Dashboard, they cannot see the Delete option now.
- Comments can now be appended (if needed) on declined and returned activity proposals.
- The Additional Forms Pending Checkbox selection was not saving when the activity status was "In Review." This issue was corrected.
- Comments were not saving for proposed activities prior to being approved. This issue was corrected.

Attendance

Virtual Attendance - Records from Other Calendars (SIS-143716)

Invalid attendance codes were being inserted into the virtual attendance posting job, which caused

attendance codes to display on the student's Attendance tool as an empty yellow box.

This has been corrected by preventing a Blended Learned Preference from saving an Attendance Excuse ID not in its own calendar. Additional checks have been added to the stored procedure to skip the execution of the Virtual Attendance Job if the Calendar ID and the Excuse ID are not associated with each other.

Arizona - Ed-Fi Student Needs and Student Special Education Program Associations Updates (SIS-145989)

The triggering logic in the Student Special Education Program Associations resource has been updated to ignore any enrollment where the Resident District does not match the site district.

The following Student Needs resource updates have been made:

- The endDate logic in all of the Student Needs has been updated to ignore state excluded enrollments.
- All of the Student Needs have been updated to ignore any enrollment where the Resident District does not match the site district.
- The overlapping enrollment end date logic for all Student Needs except SPED have been updated to only look at enrollments with a Local Service Type of 'P:Primary'.
- The enrollment logic for all Student Needs except SPED have been updated so enrollments with a Local Service Type other than 'P:Primary' only report if they are the only enrollment in a given time frame. Other local service types do not report if they overlap with any other enrollment from the same school or any other school.

A resync on the Student Needs and Student Special Education Program Association resources needs to be completed with this update.

BIE - Gradation Rate Data Mart (SIS-129882) **[Enhancement]**

The BIE Graduation Rate Data Mart tool is now available in both BIE District Edition and NASIS State Edition sites.

Data marts provide a way for states and districts to audit and federally report on a variety of student data collections. The BIE Graduation Rate Data Mart collects and stores student information relative to students of a specific cohort year and reports data associated to their exit from high school. This tool should be used after the completion of a cohort year. Data marts do not automatically update; therefore, this process must be completed on an annual basis.

All Data Marts must follow a two-step Validation and Authentication process. The validation process is critical for reviewing and correcting student data records before they are authenticated for federal reporting submission. The authentication process assumes all data reviewed in validation is correct and is used for final report sign-off and submission.

For both validation and authentication, a snapshot is used to collect student data records. Data captured by a snapshot is static and represents the state of the data at a specific moment in time. Snapshots can be generated one to multiple times as corrections are being made. Campus only stores data from the most recent snapshot.

BIE - Attendance Data Mart (SIS-129886) **[Enhancement]**

The BIE Attendance Data Mart tool is now available in both BIE District Edition and NASIS State Edition sites.

Data marts provide a way for states and districts to audit and federally report on a variety of student data collections. The BIE Attendance Data Mart is used to collect and store student chronic absenteeism records for federal reporting. This tool relies on aggregated attendance records and does not include same-day or future dated attendance marks.

All Data Marts must follow a two-step Validation and Authentication process. The validation process is critical for reviewing and correcting student data records before they are authenticated for federal reporting submission. The authentication process assumes all data reviewed in validation is correct and is used for final report sign-off and submission.

The BIE Adverse Attendance Conditions Report is now available for use in BIE NASIS State Edition sites (only). This report provides a way for states to report the impact adverse weather and road conditions have on student attendance.

Two options are available to generate the report - Summary and Detail.

- Summary provides a statistical analysis of all the students whose attendance was affected by adverse weather or road conditions. This option is best suited for federal reporting and excludes individual student information.
- Detail provides information specific to the student(s) affected. This option is best suited for internal purposes.

To assist state administrators in having more up-to-date attendance data in state level reports, the Resync State Data tool now includes the option to sync Aggregated Attendance and Attendance Excuse.

On a weekly basis, district-level data is automatically synced to the state. To capture attendance changes happening between syncs, a state administrator might consider manually running the Resync State Data tool for aggregated attendance. When using this tool, select the Check Dependencies box to include each parent object attendance aggregation is dependent on.

Washington

WA BIE– Enrollment Summary Report – WA BIE ONLY (SIS-134147)

When the Enrollment Summary report was generated for a WA BIE school, column '7: Two or more races' did not display. This has been fixed and was only found to be affecting Washington BIE schools.

In the Person Information section of the Demographics tab, a fix has been made to the mapping between Race and Federal Designation. The following mappings were corrected for Washington BIE schools (only) and existing records converted to reflect correct Federal Designations.

- When Race(s) is Black or African American the Federal Designation will display as 4: Black or African American. Previously this was mapped to 5: Native Hawaiian or Other Pacific Islander.
- If Race(s) includes more than one designation, then Federal Designation will display as 7: Two or more races.
    - If Tribe (on the NASIS tab for the student) includes a value other than 999 (Non Tribal Member), the Federal Designation will continue to display as 2: American Indian or Alaska Native.
