Scheduling Components (Minnesota)

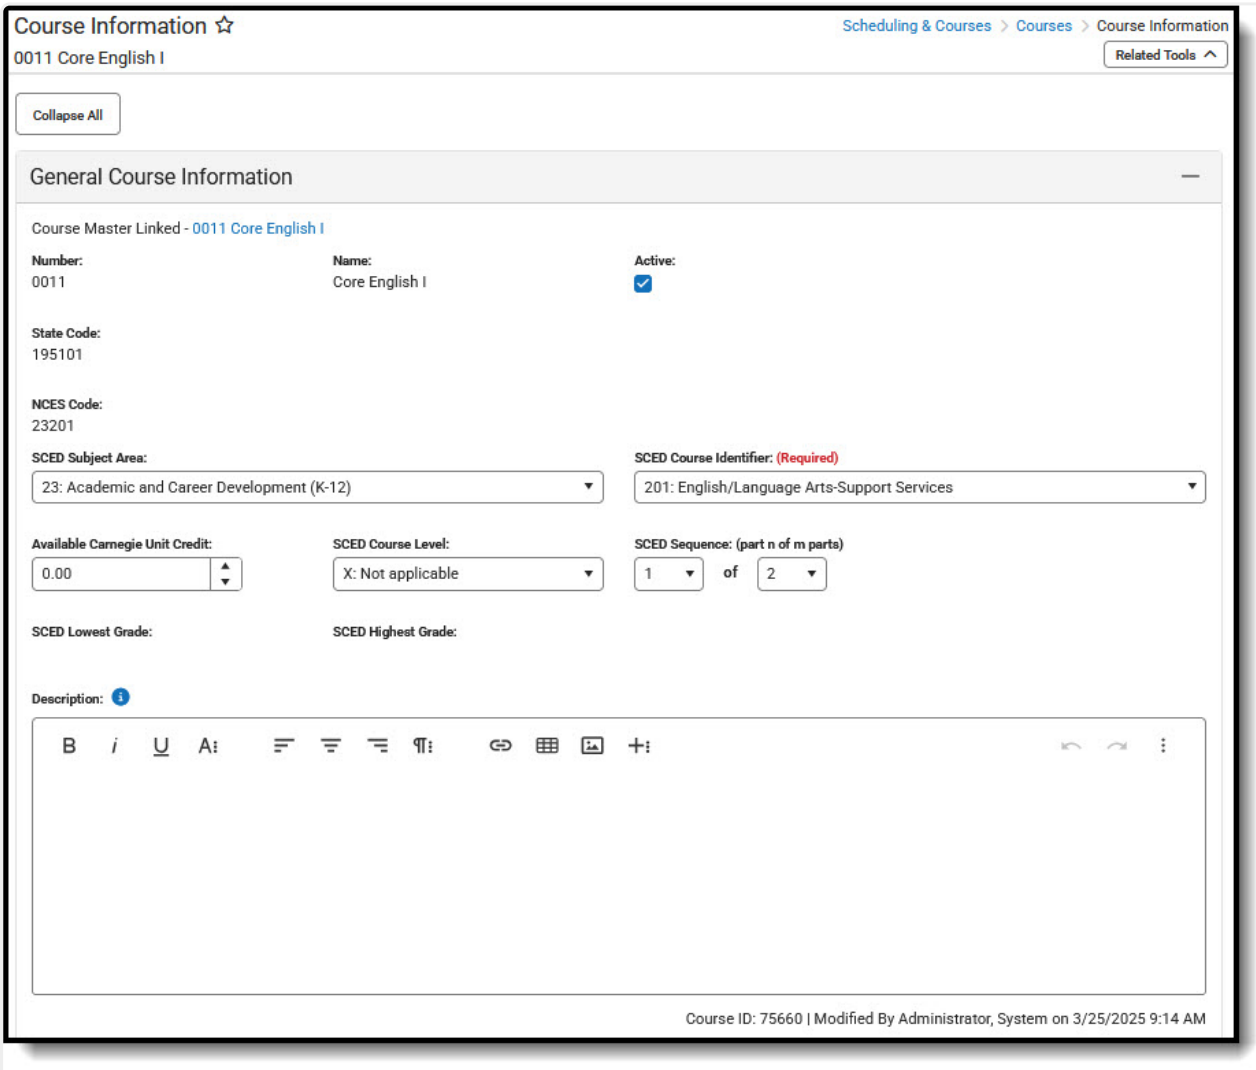

Last Modified on 07/23/2026 9:31 am CDT

Many of the tabs included in the Scheduling Components contain fields that are specific to the state of Minnesota. These fields can be used for district-tracking purposes or these fields may directly affect state reporting. The information below further defines these state-specific fields to provide guidance in entering data.

Course Fields

Tool Search: Course

The Course tab contains information about courses attached to this calendar or school. Many of the Course fields are unique to the state of Minnesota. These fields are further described below. All other fields in Course tab do not require unique, state-specific data. However, many of these fields are required and data entry in these fields is necessary. For more information on these fields, see the Course article.

Minnesota Course Information Editor

State Code

The State Code is used to enter the state code for the course. Please see the Minnesota Common Course Catalog (MCCC) for a complete list of state codes. For information on setting up state Codes for each course, please see the Course Codes article.

Course Section Fields

Tool Search: Sections

The Section tab within the Course folder is provided as a view screen, listing all sections for the selected course and basic identifying information about that section - the assigned primary teacher, where the section meets, in what term and for what period, and how many students are in each section.

Once the user selects the Edit link next to a Section number, additional tabs display, providing more details about that course section. Scheduling staff, principals, counselors, etc. can use the tools available in this view to manage course section information - entering grades, creating rosters, recording attendance, etc.

Many of the Section fields are unique to the state of Minnesota. These fields are further described below. All other fields in Section tab do not require unique, state-specific data. However, many of these fields are required and data entry in these fields is necessary. For more information on these fields, see the Sections article.
