Rx Pack - Campus.2120

Last Modified on 11/25/2025 3:58 pm CST

The following corrections are included in Rx Packs for May and June 2021. Rx Packs contain a small number of critical cases to fix urgent issues, with delivery in an immediate time frame (e.g., the fix cannot wait for the next four week Release Pack).

It is recommended that customers apply all subsequent Release Packs immediately following Rx Packs. Doing so will benefit both customers and Infinite Campus when it comes to supporting the patch.

Rx Packs are cumulative; each Rx pack will automatically include all previous Rx packs within that release. These cases will also be included in the Campus.2124 pack unless otherwise noted.

Below is a list of all Rx Packs for Campus.2120 and the date of availability:

- Rx Pack Campus.2120.10 - June 25, 2021
- Rx Pack Campus.2120.9 - June 16, 2021
- Rx Pack Campus.2120.8 - June 8, 2021

Arizona - Ed-Fi Student Program Associations Update (SIS-147183)

The triggering logic in the Student Program Associations resource has been updated to ignore any enrollment where the Resident District does not match the site district.

The overlapping enrollment end date logic in the Student Program Associations resource has been updated to only look at enrollments with a Local Service Type of 'P:Primary'. The enrollment logic has also been updated so enrollments with a Local Service Type other than ‘P:Primary’ only report if they are the only enrollment in a given time frame. Other local service types do not report if they overlap with any other enrollment from the same school or any other school.

A resync on the Student Program Associations resource needs to be completed with this update.
