CO Digital Upload K-12 Report ☆

CO Digital Upload K-12 Report

The CDPHE Immunization Digital Upload for K-12 is submitted yearly to the state beginning October 1, due January 15. To ensure the accuracy of reporting for students at all K-12 schools, this report relies on the following District, County, and School information:
 *Within System Admin > Resources > School > the State School Number and CityID must be accurately populated.
 *Within System Admin > Resources > District Information, County needs to be selected.

Effective Date: 📅

CO Digital Update K-12 Report

Report Logic

The report aggregates a count of days between the student's birth date and immunization dose dates per vaccine. The report can be run against a district's active year as well as any prior year.

Prior to running report:

- The City ID field located at System Administration > Resources > [School](#) must be populated.

- Users need to validate that the County and County number is accurate according to the State. This is located at System Admin > Resources > [Counties](#). The counties in which the School(s) reside at System Administration > Resources > [District Counties](#) must also be populated.

Report Editor

Field	Description
Effective Date	The date the report will run. The field is auto-populated with the current date, but can be changed by using the calendar icon to select a date or entering a new date in <i>mmdyy</i> format.
Format	Selection determines whether the extract generates in the State Upload, CSV, or HTML format.
Calendar Selection	At least one calendar needs to be selected in order to generate the report. Calendars can be selected by the active year, by school name or by year.
Report Generation	The report can be generated immediately using the Generate Report button. Or, use the Submit to Batch button to select when the report is generated. See the Batch Queue article for more information on this functionality.

Generate the K-12 Digital Upload Report

1. Enter the desired **Effective Date**.
2. Select the **Format** of the report.
3. Select the **Calendar(s)** from which to report information.
4. Click the **Generate Extract** button or use the **Submit to Batch** button. The report displays in the desired format.

Report Layout

Data Element	Description	Location
District Name	The name of the district selected in the report editor. <i>Alphanumeric</i>	System Administration > Resources > District Information > Name dis.district

Data Element	Description	Location
School Code	The State School Code. <i>Numeric</i>	System Administration > Resources > School > State School Number sch.Number
School Name	The school name. <i>Alphanumeric</i>	System Administration > Resources > School > Name sch.name
School Address	The address of the school. <i>Alphanumeric</i>	System Administration > Resources > School > Address sch.address
School City ID	The city ID of the school. <i>Alphanumeric</i>	System Administration > Resources > School > City ID sch.cityid
School County ID	The school county ID of the school. <i>Alphanumeric</i>	System Administration > Resources > District Counties > Number county.number
School Zip Code	The zip code of the school. <i>Numeric</i>	System Administration > Resources > School > Zip sch.zip
Date Created	The effective date selected in the report editor. <i>YYYY-MM-DD (space) HH:MM:SS</i>	Selected in report editor
Student ID	The student's State identification number. <i>Numeric</i>	Census > People > Demographics > Student State ID student.stateID
Grade	The student's grade level. <i>Alphanumeric</i>	Student > General > Enrollments > Grade student.grade

Data Element	Description	Location
