Tool Search: Conditions

The Conditions tool lists all medical conditions that have been reported for a student at the school. From this tool, users are able to view or delete current conditions or create a new condition for a student. This tool also allows users to enter treatment information on a condition and establish a schedule for when treatment(s) should occur.

Health Conditions Tool

The Health Condition/EMT symbol only displays next to the student's name throughout Infinite Campus if the following is set:

- The System Preference [Flag Health Conditions](#) is set to Yes.
- The Condition in the [Condition List](#) is marked as flagged.
- The Health Condition assignment for the student is marked as flagged.

Conditions and treatments can be added for a student AFTER the [Condition List](#) and [Treatment List](#) are populated in System Administration.

Health Conditions and Treatments are often entered together. The Student Health interface combines the entry of conditions and the entry of treatments for complete health information on a student.

Conditions are entered into Campus with a Code and Description. The International Classification of Diseases (ICD) medical coding system and/or district created codes and descriptions can be entered. Add a Condition for a student using the Code Search or the Description Search box located in the top right corner and activated by selecting the magnifying glass icon. Conditions not previously entered in System Administration can be entered using the Code and Description fields.

Health Condition Fields

Health Condition Fields

The following table defines the available data elements on the student's Health Condition.

Field	Description
Code Search	Search field used to return codes associated with a health condition. Conditions which are not marked as Active in the Condition List do not display in this search.
Description Search	Search field used to return health descriptions associated with a condition. Conditions which are not marked as Active in the Condition List will not appear in this search.
Code	Code associated with a health condition.
Description	Description of a health condition. Conditions no longer marked as "Active" in the Condition List will be labelled as INACTIVE.

Field	Description
Start Date	Date the health condition was first assigned to the student. This start date is the date the school became aware of the condition, not when the student was diagnosed with the condition.
End Date	End date of the health condition. Ended conditions display in red with the start/end dates.
Status	Indicates the status of the Health Condition. Default values are as shown, but they can be modified in the Attribute/Dictionary . <ul style="list-style-type: none"> • N: Not resolved • R: Resolved • U: Unknown
Initials	Initials of the individual entering the health condition.
Referring Provider	
Link to Person	This dropdown is populated with active providers set up in the Referring Provider tool. The Name field auto-populates with the person's name after selection in this dropdown.
Name	Name of the student's provider. This information is used in conjunction with Medicaid billing services.
Phone	Phone number of the provider.
Credential Suffix	An abbreviated name of the provider's health credential.
NPI Number	The person's National Provider ID. This is a unique 10-digit number for every medical provider across the nation.
NPI Enum Date	The date the NPI was assigned.
Primary Taxonomy	The code that identifies the provider's specialty.
Flag	
Flag	Indicates the health condition can be marked to appear next to the student's name. This is selected when a flag displays next to the student's name in the header row. The condition start and end dates determine when the icon displays.
User Warning	Tool tip that displays when the EMT symbol is hovered over. This field is required when the Flag checkbox is marked.
Instructions	Detailed guidance on how to handle the student when the health condition affects the student during the school day. When the health condition is flagged, the Instructions display when the EMT symbol is clicked
Comments	Additional comments related to the health condition.

Health Condition Flags

New Medical flags cannot be created. New flags are only available for districts who created flags prior to 2010.

If a student has more than one condition that is flagged, only one EMT symbol will display. All user warnings will be listed in one hover box. Health Condition flags that display as an EMT symbol are not the same as medical flags that may also be created.

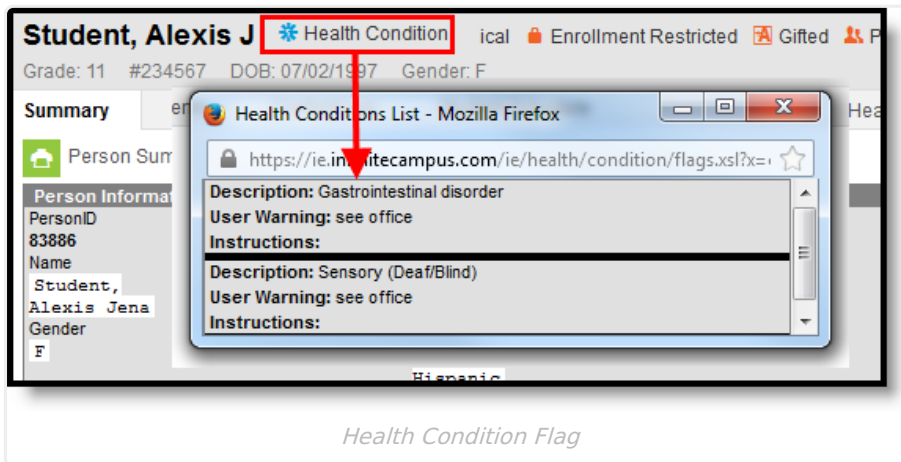

As previously mentioned, the EMT symbol will only appear if the following is set:

- The System Preference [Flag Health Conditions](#) is set to Yes.
- The Condition in the [Condition List](#) is marked as flagged.
- The Health Condition assignment for the student is marked as flagged.

Medical flags display when:

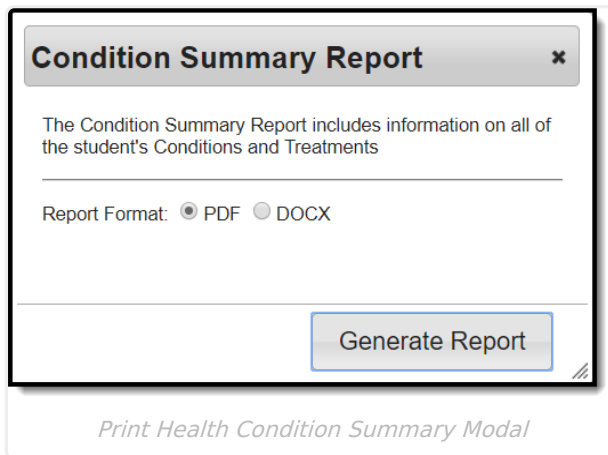

- The school or district has [created a flag](#) called medical.
- The Medical flag is assigned to the student.

For more information about the condition, users can click the EMT symbol, which will display descriptions, the entered user warnings and any entered instructions in a pop-up window.

Print Health Conditions

Click the Print button to display a list of the student's conditions. The report can be generated as either a PDF or DOCX format.

Print Health Condition Summary Modal

For reports with more detail, see the [Health Condition Summary](#) report or the [Health Condition Alerts](#) report.

Health Condition Report Example

Enter a New Condition

1. Select the **New Condition** icon in the action bar at the top of the **Conditions** tool.
2. Enter the name of the condition within the **Description Search** field. Clicking the magnifying glass icon will search for matching International Classification of Diseases (ICD) entries. Matching entries will appear in blue text.
3. Select an entry to load both the description and ICD code.
4. Enter the **Start Date** by typing the date in *mmdyy* format or by clicking the calendar icon and selecting the date.
5. An **End Date** should be entered if the condition is no longer being tracked or has been resolved.
6. Enter the initials of the user entering this data within the **Initials** field.
7. When applicable, select the provider name from the **Link to Provider** dropdown.
8. Enter the name of the doctor who diagnosed this condition within the **Name** field.
9. Enter the **Phone** number, when available.

10. Enter the provider's **Credential Suffix**.
11. Enter the provider's **NPI Number**.
12. Enter the **NPI Enum Date** in *mmdyy* format, or click the calendar icon to select a date.
13. Enter the **Primary Taxonomy**.
14. Select the **Display Flag** checkbox.

This checkbox may only be chosen if the condition is marked as able to be flagged in the [Health Conditions](#) list in System Administration. If the chosen condition is not able to be flagged, a warning will appear upon selection of the checkbox, noting the condition is not able to be flagged.

15. Enter a **User Warning** comment. This comment will appear when the flag is hovered over by a user.
16. Provide **Instructions** for the condition.
17. In the **Comments** field, enter any additional information related to the condition as needed.
18. Select the **Save Condition** button when finished. The condition will display in the Health Conditions section.

End Health Conditions

1. Select the Health Condition that should be ended.
2. Enter an **End Date** for this condition.
3. Change the **Status** to be **R: Resolved**.
4. Click the **Save** button when finished. The health condition that is ended will display in the Health Conditions window in red text with the start and end date of the condition, indicating it has been ended.

Ended health conditions display AFTER active health conditions.

Entered dates are considered active through the end of that day. For example, if a condition was ended on November 11, 2014, the condition appears active until midnight on November 11. On November 12, the condition is considered ended.

End Dated Health Condition

Add a Treatment to a Health Condition

A Treatment record should document the nature of what needs to be done each time the student receives the treatment. When the treatment is actually provided, it should be entered in a Health Office Visit.

See the [Treatment List](#) or the [Health Office Visits](#) documentation for additional information.

Records can be created for Treatments not included on the [Treatments List](#). However, Treatments entered directly into the Treatment Detail are considered inactive and cannot be scheduled.

Health Condition Treatment Data Elements

The following table defines the available data elements on the student's Health Condition Treatment.

Data Elements	Description
Code Search	Search field used to return codes associated with a treatment for the health condition.
Description Search	Search field used to return health descriptions associated with a treatment for the condition.
Code	Code associated with a treatment for the health condition.
Description	Description of a treatment health condition.
Start Date	Date the treatment was first assigned to the student. Dates determine whether the treatment appears in the Health Office Visits tool.

Data Elements	Description
End Date	End date of the health condition treatment. Dates determine whether the treatment appears in the Health Office Visits tool.
Status	Indicates the status of the Health Condition. Default values are as shown, but they can be modified in the Attribute/Dictionary . <ul style="list-style-type: none"> • N: Not resolved • R: Resolved • U: Unknown
Initials	Initials of the individual entering the health condition treatment.
Comments	Additional comments related to the health condition treatment.

Enter a New Treatment

1. Select an existing condition from the student's **Health Conditions** list.
2. Select the **New Treatment** button at the top of the Conditions tab. This will link the treatment to the selected condition.
3. In the **Code Search** or **Description Search** field, enter a code or description of the treatment and click the magnifying glass icon to search for matching entries. Matching entries will appear in blue text. Selecting an entry will auto-populate the **Description** and **Code** fields. A Code and Description that are not in the Treatment List can also be entered.
4. Enter the **Start Date** by typing in the date in *mmdyy* format or by clicking on the calendar icon and selecting the date.
5. Enter an **End Date** to indicate when the treatment is no longer needed if applicable.
6. Enter a **Status** if applicable.
7. Enter the initials of the user entering this data within the **Initials** field.
8. In the **Comments** box, enter any pertinent information related to the treatment.
9. Select the **Save** button when finished.

When a selected treatment description contains special characters (quotation or question marks), a warning message displays indicating such. Modify the description to remove those special characters to allow saving.

Enter Health Condition Contact Records

Once a condition is entered and a treatment for that condition is entered, a Contact record can be added each time the health staff contacts the student or parent about the condition or treatment. The Treatment must be selected in order to display the New Contact button.

Health Condition Contact Detail

Enter Contact Records

1. Select the **New Contact** icon from the action bar. A **Contact Detail** editor displays.
2. Enter the **Date** of the contact.
3. Select the staff person who made the contact from the **Handled By** dropdown list. Staff in this list have the Health checkbox marked on their [District Assignment](#) record.
4. Enter **Comments** about the contact.
5. Click the **Save** button. The contact record displays underneath the Treatment record.

If the staff person who handled the contact ends their district assignment at the school, the staff person's name still displays in the field but displays the start and end dates of the Assignment. This allows historical tracking of entered data for the student's health record.

Schedule Health Office Appointments

After a treatment has been linked to a condition, a user can attach appointments to the treatment. Both single and recurring appointments can be assigned. Users can determine the frequency of recurring visits.

Users must have calendar rights to the calendar selected to schedule Health Office appointments.

Schedule Appointments

Add Scheduled Appointments

1. Select an existing **Treatment** in blue from the Health Conditions editor.
2. Select the **Schedule Appointments** button. This will link the appointment schedule to the treatment.
3. Enter the **Date** by typing it in *mmddyy* format or by clicking the calendar icon and selecting the date. This date is when the appointment was first scheduled. It defaults to the current date.
4. Enter in the **Appointment Time** and click the **Add** button to attach the appointment time to the date. To add multiple appointment times to a scheduled appointment, simply enter in the

appointment time and press the Add button. Users may also delete specific appointment times by selecting the black X located to the right of the appointment time(s).

5. Select the occurrence of the scheduled appointment (i.e. **Single Appointment, Daily, Weekly, Monthly**).
6. Place an end date on the recurring appointment by selecting the **Repeat Until Date** radio button and entering the date in mmddyy format or by using the calendar icon and selecting the date.
7. To limit the number of times the appointment should occur, select the **Repeat Times** radio button and enter the desired number.
8. Enter any additional information within the **Comments** field.
9. Select the **Save Schedule** button when finished.

The Health Office Visit Scheduler displays a warning message when users schedule appointments that fall on a non-instructional and non-attendance day if the scheduling frequency is Weekly or Monthly. The warning message allows users to view the date(s) of the appointment(s) that could not be scheduled.

Users cannot create treatment appointments that extend past the End Date for a Treatment or for inactive Treatments.

Cancel Scheduled Appointments

1. Select the existing **Treatment** in blue from the **Health Conditions** editor.
2. Select the **Cancel Future Appointments** icon. This will cancel all future appointments linked to this treatment. Future appointments are unsaved appointments on the cancel date and later. Previously scheduled appointments can also be canceled by selecting the checkbox at the bottom of the Schedule Appointments editor when creating new appointments.
3. Enter the date in *mmddyy* format or by clicking the calendar icon and selecting the date.
4. Click the **Save** button when finished. This will cancel all unsaved appointments scheduled on or following the date entered.

Future appointments are not automatically cancelled when a student's enrollment ends.

Manage Condition Documents

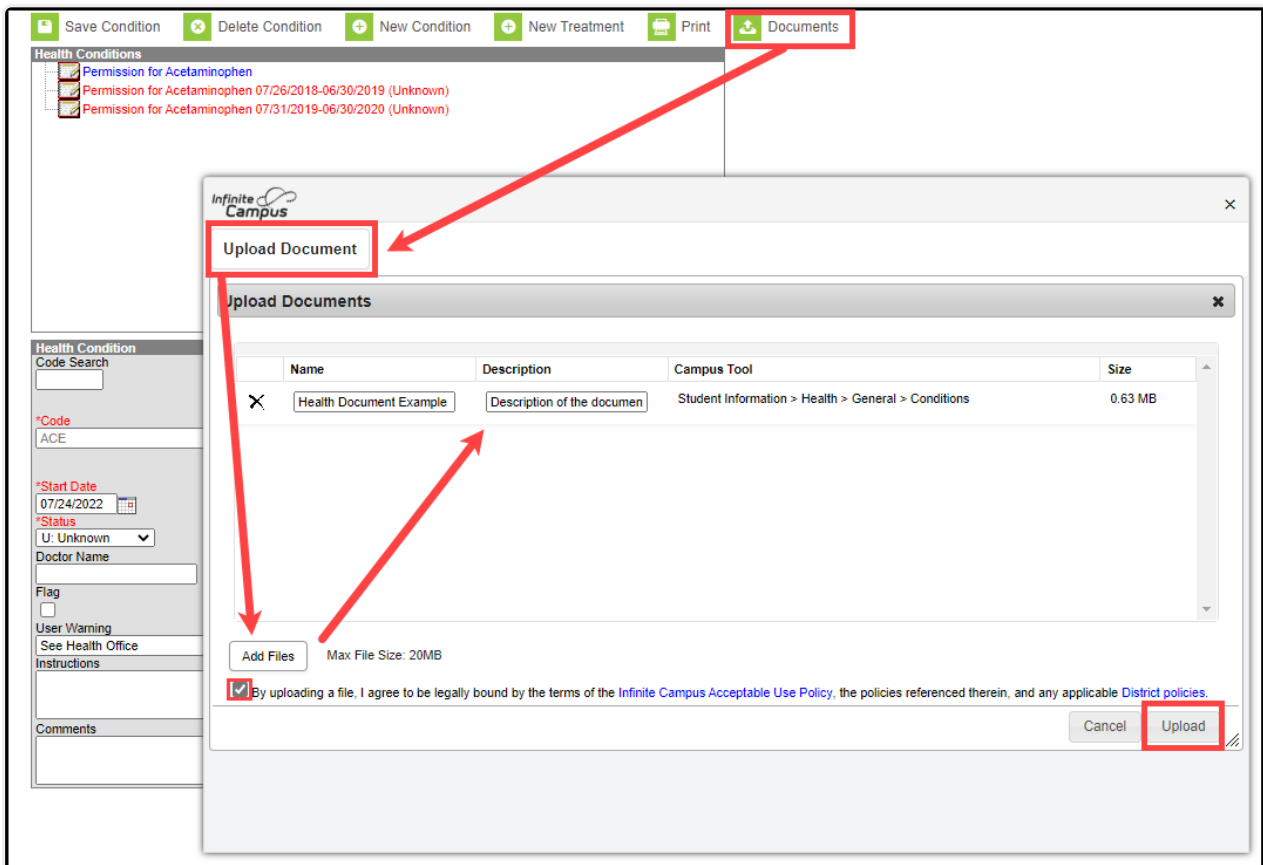

The Conditions tool allows you to store, manage, and view all condition/health-related documents associated with the selected person.

Upload a New Condition Document(s)

1. Click the **Documents** button. A separate window will appear, containing an Upload Document button and the Documents List.
2. To begin uploading a new document, click the **Upload Document** button and select **Add**

Files.

3. Locate the file on your local hard drive or network and click **OK**.
4. The file will appear in the Upload Documents list. From here you can add a Description (optional), see what tool will be associated with the file, and the size of the file.
5. Mark the checkbox in the left-hand corner to agree to the terms of the Infinite Campus Acceptable Use Policy (as well as any district-mandated policies).
6. Click **Upload**. The file is now uploaded and attached to the student where it can be accessed at any time.

Upload Condition Document

Delete or Edit an Existing File

When you need to delete the file, click the X () next to the file needing deletion.

When you need to edit file details, click the pencil icon () next to the file. The Edit Document editor will appear, allowing you to edit the file name, description, or replace the file.
