

New Blended Learning Groups - Video

Last Modified on 10/21/2024 8:21 am CDT

Blended Learning Groups allow school districts to manage which students are learning onsite and which are learning virtually. Tools in Campus let staff see whether a student assigned to a group is learning virtually on a given day. Entire groups can quickly be moved between virtual and onsite learning when the need arises.

In this video, you'll learn how to create both Manual and Automatic Blended Learning Groups, and assign students to them.
