Report Logic

One record reports:

- per student,
- per K-12 enrollment, (This includes ungraded elementary K-6, secondary students (GED, Alternative), and partial enrollments)

- per school.
- Student must have an enrollment record within the set school year's start and end dates and align with Student Lite records.
- Record dates cannot overlap.
- Students with no survey records do not report.

Using the survey date on the Digital Equity tool, data reports from the most recent record that falls within a school year enrollment date for the student.

- The most recent survey date between the start and end date reports.
- If there are multiple surveys, the most recent reports.

Reports by the student enrollment and the assigned (enrolled) School Building Code

- All students are reported who are actively enrolled within a school year start and end date
- When a student is enrolled in a new building location, a new record is reported with that new building information.

If a student is enrolled in more than one building AND has multiple enrollments...	Data from...
in the same school	the most recent enrollment is used.
in different schools	the primary enrollment is used.

Extract Editor Fields

Field	Description
Extract Type	The SIRS Extract to be generated.
Start Date End Date	The first and last date on which the report looks for attendance events.
Included State Grade Levels	Identifies the state grade levels to include in the report.
Format	The Format in which the report should generate. Options are State Format (CSV) and HTML. Use State Format for reporting information to the state and the other types for data review and verification.
Ad Hoc Filter	Selecting a filter limits the results to only those included in the filter. The following extracts do NOT use this field: Attendance Code, Day Calendar, Location Marking Period Code, and Marking Period Code.
Select Calendars	Identifies which Calendar(s) should be included in the report. Calendars can be sorted by active year, by school or by year.

Field	Description
Generate Extract/ Submit to Batch	Users have the option of submitting a report request to the batch queue by clicking Submit to Batch instead of immediately generating the report by clicking Generate Extract . The batch process allows larger reports to generate in the background without disrupting the use of Campus. For more information about submitting a report to the batch queue, see the Batch Queue article.
