Tool Search: SPED State Reporting

The Special Education State Reporting allows users to store and manage student Special Education state reporting data. This tool removes the legal burden of having a Special Education team meeting to amend the setting for age-based changes, such as an early childhood student aging out.

This tool contains two sections: State Reporting and Flags.

Fields vary by state. Please see your state's specific article for more information on Special Education State Reporting procedures in your state:

## Add a New State Reporting Record

A new record should be created anytime a student enters a new Special Education Setting. Fields vary by state.

State Reporting records cannot overlap. This means the previous record must end before the new record begins.

## Delete or End a State Reporting Record

To delete a State Reporting record, select the record from within the State Reporting Editor window and click the **Delete** button. This action COMPLETELY removes the record from Campus. Only do this when the record was completed in error.

To end a record, select the record from within the State Reporting Editor window and enter an **End Date**. This ends the record and allows a new record to be added, if applicable.

# Tool Rights for Special Education State Reporting

For full access to Special Education State Reporting, users must have R rights to the Special Ed State Reporting tool and at least **Read Only** Calendar Rights for the calendar selected in the Campus toolbar.
